

THE BANKS AND THE CRISIS.

The state of the monetary affairs of this country gives evidence, that another crisis among the Banks is fast approaching.—The extravagant speculations of the Bank of the U. States and some other institutions, in cotton, and its futile attempts to control not only the domestic but the foreign markets for that great staple, is about reacting upon its own head, and if the next news from Europe shall prove of the same disastrous character, there is little doubt, that another suspension of specie payments must be the consequence.

It is probable that this time to review the past and examine the truly lamentable position which we occupy at the present time, among the nations of the earth. Just at the moment when the beneficent hand of the divine providence has shored upon us every blessing, when a propitious season has rewarded the husbandman with a plentiful crop of every thing necessary to the subsistence of man, when peace both foreign and domestic has spread its benign wings over our beloved country, and health and industry reign untrammelled throughout the land.—Yet at such a time as this, in the midst of all this prosperity, we are awaiting the movements of FOREIGN MOVED INSTITUTIONS, to ascertain whether or not another suspension of specie payments, is to take place, and the arm of our National Industry be again paralyzed by the baneful influence of this measure.

Was this state of things the result of a measure by which our national honor was to be sustained or our national property promoted, we might be induced to bear the evil with patriotic philosophy, but such unfortunately, is not the case, the measures of which this state of things are the consequence had for their object no such purpose. The pecuniary advancement of a few individuals was the only end in view in entering into the ruinous speculations of the last few years. And yet the whole nation is to drink copiously of the drugs of the cup.

To a reflecting mind the question naturally recurs, must there not be some radical change in the course of our policy, if we must not something be wrong, when a few individuals can put into operation a scheme, the success of which is to be their own aggrandisement, and the consequence of its defeat, wide spread national ruin?

The Democratic party have said—and say now that there is, they have told the people, by their orators in Congress and the press has not been idle in promulgating the fact, that so long as they permit the financial arm of the Government, to be wielded by men irresponsible to the people, that such must be the case, the nation must be the slave of the speculator, and bear the consequence of his mis-movements.

Such has ever been the case: the evils we have heretofore suffered have been the result of the same cause, but some fruitful expedient has been found, such as the "Specie Circular," to turn your attention from the true cause of the evil, we have listened and believed; and appear prepared to listen and believe again, but fortunately there is no such circumstance at hand to enable those who have done the mischief to fetter it upon the General Government, and every tub will have to stand upon its own bottom in this affair.

SOMETHING TREMENDOUS!!

The Swiss Dragon who occasionally caters for the columns of the Virginia Free Press, is in extatic at the idea of our late patriotic having resigned from the Editorial staff, and has composed at least six lines of original matter, and quoted two lines of poetry upon the subject. His friends appear astonished at the phenomena, and we ourselves should be thinking about anod glass to gaze through at the meteor, had we not discovered the same disposition that we have so often before noticed, to grapple with low things.—Yes, reader, the inspiration of poetry, the divine hallucinations that operate to make men's minds soar above the world and its enjoyments, have been insufficient to cause the imagination of the Swiss to rise above the legs of our former colleague.—Now, to those who are acquainted with the calibre of the mind, and the length of the locomotive members in question, it will not be a matter of surprise that the most lofty aspirations of the former should perch upon the top of the latter, and feel as proud as the eagle on the mountain's peak.—For ourselves, not having that inestimable pleasure, we have long been at a loss why the lower extremities of our late partner, were so much trouble to the Dragon, unless he imagined that mentally they were some assistance to him, in enabling him to run faster, stop longer, jump high,

THE SPOON AT BOSTON.—The Mercantile Administration observes:—There was always some quantity stored and this night, in this vicinity, the north-east. The wind blew with great violence, and the rain fell in great abundance.—Many fruit trees in this vicinity were stripped of the fruit, many trees were blown down, and forest trees prostrated.—In this city some staves were stripped from the roofs of buildings, and the branches of trees torn off. Also the "Favillon Theatre," (a large tent erected on Haverhill street) was entirely prostrated.—The Salem Observer, of Saturday morning, says that it snowed there on Friday afternoon.

During the night a two story wooden house was blown down at Cambridge.

SEVERE DEATH.—We learn from the St. Louis Republican of the 23, that the Rev. B. G. Krymen, of the Catholic Church, and Librarian for the St. Louis University. He complained a little in the evening, and was visited about 11 or 12 o'clock at night, at which time he did not think himself seriously indisposed. When some of the Professors called at his door about four in the morning, they received no answer, and on entering found him dead. The deceased was a very worthy and pious man, and much esteemed by his brother professors and students of the institution.

The St. Louis Bulletin gives a few further particulars in relation to the convict who was recently shot by the sergeant of the guard at Jefferson prison.—The deceased, a few days previous, had complained to the inspector of a being inflicted upon him by the sergeant, when he pointed at him with the marks of which were still visible on his head.—On the day of the murder, the deceased, being a stone mason, was going to work without his hammer, the sergeant called to him and asked him where his hammer was. The convict replied that he had left it, when without further words, the sergeant shot him down. Mr. Gordon, one of the lessees of the penitentiary, attempted to arrest the sergeant, when he turned and attempted to shoot Gordon; but his pistol missed fire. He was finally arrested and lodged in prison under heavy irons.

THE WAY OF DOING THINGS IN TEXAS.

On the 5th of July a man named Richardson was fined \$10 by the Mayor of Galveston, for being concerned in a fight. Not being able to pay the fine, he was committed to prison till the money should be forthcoming. When first committed, he proposed to work out the amount; but his pistol streets; but this offer was declined, as there was no work to be done. When asked to work two weeks afterwards, he refused. He was detained in jail until the 12th August, except a few days when he was sick in the hospital.—A meeting of citizens was held on that day who resolved that the poor fellow had received punishment enough, and requested the Mayor to discharge him and he was accordingly discharged.

LIFE IN NEW ORLEANS.—If in winter we are the gayest people on this continent, with more variety of life and manners than any other city presents, in the summer we are the dullest. The monotony of existence caused by the very general absence, is only varied by the few and exciting scenes it creates. We proceed to mention one, the relation of which caused a chill through our hearts, and struck the "electric chain" by which we are strongly bound. It surely must have thrilled the heart of the beholder with sudden horror.

Dr. Lambert, an excellent as well as an eminent French physician in this city, relates that during his frequent rides through the different streets, his attention was almost always been attracted as he passed a house where a poor family lived. The family consisted of a man and his wife, both rather young, and the latter good looking, with a little infant smiling in beauty, and about ten months old. He was led to notice them from the appearance of content that lived there, and their being frequently on the banquette before the house. After the fever set in, he still saw them for several days, happy as usual, but at length he "missed them from the accustomed place." This he did for two days, until on the third, feeling uneasy for them, he stopped his gig before the house, alighted—rapped at the door.—No one answered; silence was in the mansion. He pushed open the door and went in. There lay the husband and the wife on the floor, both dead of the fever, and the former decaying! The child was still alive, with the beads on a second of the sustaining fluid from the breast. Dr. L. says that familiar as he is with scenes of death, nothing before has ever shocked his feelings to half the extent. With a praiseworthy benevolence he has taken measures to have the infant protected.—Such is "life in New Orleans."—N. Orleans Times.

Well, Abel, what do you think of our native genus Mister Forrest?

Well, I don't go much to theatricals; that's a fact; but I do think he piled the scenery up a little too high in that last scene.

The Western (Ill.) Star says, that while Mr. Wilson Corey was cutting down a large oak, a flash of lightning came down from the top of the tree, and struck the ground beneath his feet, making a circular hole about five feet in depth, and burying him in it up to his neck, so that he was utterly unable to extricate himself. On the following morning he was found and rescued by his friends.

What is no less strange, the Star adds, that for a pathos, which, without giving Mr. Corey the slightest intimation of their presence, were concealed in the upper branches of the tree, during the whole time he was at work on it, were all killed by the flash.
