TO FASHION.

tomb.

GAY Fashion ! thou goddess so pleasing, However imperious thy sway, Like a mistress, capricious and teasing, Thy slaves, tho' they murmur, obey.

The simple, the wise, and the witty, The learned, the dunce, and the fool, The crooked, ftraight, ugly and pretty, Wear the badge of thy whimsical school.

Yet wave but thy frolicsome banners, And hofts of adherents we see, Arts, morals, religion, and manners, Yield implicit obedience to thee.

More despotic than beauty's thy power, More than virtue thy rule o'er the

mind, Too transient thy reign, as a flower

That scatters its leaves to the wind. Ah! while foolifh thou dealeft such

measures No matter how fleeting the day !

Be wisdom, dear goddess, thy pleasure, Then lafting as time be thy flay.

ANECDOTE.

A Peasant being at confession, accused himself of having flolen some hay-the father confessor asked him how many bundles he had taken from the flack ?--"That is of no consequence, (replied the peasant) you may set it down a waggon load, for my wife and I are going to fetch the remainder very soon."

TRUE COURAGE.

An officer of diffinction, and tried valor, refused to accept a challenge sent him by a young adventurer, but returned the following answer: " I fear not your sword, but the anger of my God. I dare venture my life in a good cause, but cannot hazard my soul in a bad one. I will charge up to the cannon's mouth for the good of my country, but I want courage to ftorm hell."

From the Virginia Argus.

MR. PLEASANTS,

I have long thought of communicating to the public, a remedy for the cure so very indifferent, that from 90 fheep I for young negroes. Immediately after fhearing, I made use of the following mixture :- Three gallons of Tar, and three gallons of Train Oil, boiled together, to which was added three pounds Roll Brimflone, finely powdered and

firred in. This quantity was sufficient for the above number, and was poured on with a kitchen ladle, from the top of the head along the back bone to the tail. At the next fhearing, '(in 1807) from 78 Waves o'er the brightening sky her magic of the same theep I sheared 360lbs of very good wool, and inftead of 20 to-25 sorry Lambs, commonly raised from my flock, I raised 55 as fine as ever I saw. Since this application, I have frequently been asked by my neighbours where I got such fine theep from. This remedy was taken from an old Eaftern paper, which, I am sorry to say, I have loft or mislaid. It may be necessary to add, that I have continued to make use of this application with the same success, and that when train oil is difficult to be had, any kind of grease, such as is used for plantation leather will answer. I am, Sir,

Your obedient servant, J. NELSON. Mecklenburg, 15th June, 1808.

Martinsburg, June 1, 1808.

WILL BE PUBLISHED In a pan-phlet, at the office of the Alexandria Daily Advertiser, in a short time, AN ADDRESS

TO THE PEOPLE OF THE U. STATES, On the importance of encouragin AGRICULTURE & DOMESTI MANUFACTURES: Tending to thew that by a due encouragement of these essential interefts, the nation will be rendered more respectable abroad & more "

prosperous at home. Together with an account of

THE IMPROVEMENTS IN SHEEP AT AR-LINGTON,

The native Sheep of Smith's Island, and the plans proposed of extending this valuable race of animals, for the benefit of the country at large :

BY GEO. W. P. CUSTIS, Esq. Of Arlington House, in the District of Columbia.

AT a time when the energies of the nation seem awakened to the flate of our foreign and domestic concerns, we conceive that the important (interests of A-griculture and Manufactures should meet with a considerable fhare of the public discussion. Certain it is, that at no period of our political hiltory could these national subjects excite more intereft or be more properly urged to the notice of the public mind. The unsettled and impending appearance of our foreign affairs, and the present diffurbed flate of the European world, renders it doubly necessary for the citizens of America to cherifh and promote their domeftic policy, whereby they may derive those resources which are now obtained from abroad and create wealth and industry within themselves. Too long have these important and patriotic interests been neglected. The nation now feels their want, and we truft will duly provide for their support. Government, hitherto engaged in other concerns, will now cherith those domestic inflitutions, which will preserve the nations's dignity and promote the peo-

ple's welfare. Of the merits of the little work we are about to issue to the public, it is not our province to decide, but of the advantages to be derived from its sale we would beg leave to say every thing which a disinterefted exertion in the cause of Doand as the profits of this work, after the expences of publication are paid, from my bed and board without any Mrs. Susan Howell, Ellen Hunter, will be solely devoted to the purposes of just cause, this is to give notice that I John Haynes, James Hite, James How- the Arlington Inflitution, we may hope will not pay any Debts of her contracting, and confidently expect a liberal patron- after this date. age from a discerning and patriotic com-EDITOR.

JOHN COCKRELL. July 15, 1808.

From the London Globe. . CURE OF HYDROPHOBIA.

Robert Dixon, a weaver, of Norham-Main's, near Berwick, was bitten by a dog known to be mad, on the 30th of Juevery symptom became more and more

dication of hydrophobia. That Robert Dixon was perfectly recovered in the September following and was living, and n good health at the time this account was first published, being a period of 33 years after the injury was received."

The mode of treatment was as fol-

1ft. To the wounded leg a caustic was applied, which kept discharging from the first commencement of the symptoms, till some time after the cure. 2nd. The leg was frequently bathed

with warm oil. 3d. A tea spoon full of the following electuary was administered two or three imes a day : Peruvian bark, in powder, wo ounces, valerian in powder, one unce; cinnebur of antimony, one ounce; camphor, one drachm and a ali; Russia caftor, half an ounce; musk, half a drachm; conserve of wormwood, four ounces; syrup of saffron, a sufficient quantity to form an electuary. Opium was also liberally given to assuage the irritation & spasms. To the throat was applied a plaifter, composed of opium, musk, camphor, asafætida, and

The laft application seemed to be more houses, large and small; conceive that effectual than any other medicine em- you see those houses, moft of which are ployed. On recovering his intellects and speech, he declared he experienced. the greateft relief form this plaifter ; and that in a fhort time after it was applied, he feit an agreeable and soothing warmth, desended from his throat to his leg in the same course and direction that the spas-cries were sufficient to pierce the heart modic firicture had ascended; and all of any person not callous to all kind of the complicated & painful symptoms pro-feeling. 1 bbl. rum, 1 do. brandy.

disposition to indemnify for the loss. ib. barrels of gun powder.

that the Embargo has been prolonged by the improper conduct of Mr. Pickering and those of his sect : And an adherence ; tal intereft to the nation. When it is ; known that expectations are entertained in Great Britain that the Americans will turn insurgents again & their own government, that our conflitution, may be subverted, and that by a continuance of the orders of council the Britith ministry can compel the people of the United States to choose a president contrary to their own wifnes, what remains to be done but to persift in the embargo, (even. were it not an act of the most profound and consummate policy,) in order to convince the cabinet of St. James that such expectations will not be fulfilled ? Three months ago the embargo in all probability would have been raised, had it not been for the howlings of the Essex. Junto and the gazettes devoted to their views. Diffressed by their own orders of council, terribly awed at the prospect upon maritime law; when the first glimmerings of that baleful spirit of misrepresentation of the dispositions of the people of this country reached England, and influenced the Britith miniftry to wait the fulfilment of a false and deluding prophecy. Every sentence of Mr. Pickering's letter ; every paragraph against the measure, from the day it was enacted to the present time, has a tendency to rivet the embargo upon the country more firmly. But, "Good cometh out of evil." Another English ministry will know better how to estimate the promises and predictions of other Pickerings: and growing wise by experiment, will learn that "Jeffersonian policy" is not injurious to Great Britain, only when the policy of Britain is inimical to her own real interefts. [Mon.

The British ministry seem to make themselves happy under the belief, that six months embargo will produce a revolution in the U. States-and so it has, and a resolution also ; to support the government of our country in the prosecution of all defensive measures its wisdom may see proper to adopt.

The London papers abound, in general, with quaint paragraphs, very amusing to readers fond of light articles .----The following are copied from the Morning Post, of April 30, which are pleasant without being offensive : [Mon. " The Dublin Theatre has lately been interefling scene, imitated the sound of a Cuckoo. At length-it-was found necessary to pull out the ill-omened bird by his beak.

" It is inrewdly conjectured, that in the depredations committed by the Spanith mob in seeking for the Prince of Peace's picture, they were not altogether inattentive to the King's picture, which, however, they would take care to pocket, and not deftroy.

"When Alexander ascended the. throne, he promised to tread the steps of his grand-mother; but Bonaparte has sent his dancing mafter to him, to teach him some new tteps."

From the NATIONAL INTELLIGENCER.

MR. SMITH,

Having heard of several inftances of the excessive use of cold water proving fatal this week, and the weather continuing unusually warm, (the mercury rising above 90 to 95 degs. in Faren-heit's thermometer,) I am induced to send you for publication, some extracts from an account given of that disorder and method of cure by Dr. Ruth ; with a view of warning the uninformed against its deleterious consequences, as medical assistance can seldom be obtained in time to afford relief.

" Few summers elapse in Philadelphia, in which there are not inftances of many persons being affected by drinking cold water.

In some seasons four or five persons have died suddenly from this cause, in one day. This mortality falls chiefly upon the laboring part of the community, who seek to allay their thirlt by drinking the water from the pumps in the ftreets, and who are too impatient or too morant to use the necessary precautions for preventing its morbid or deadly effects upon them. These accidents seldom happen except when the mercury rises, above 85 degrees in Farenheit's Thermometer."

"Three circumftances generally concur to produce disease or death from drinking cold water. 1ft. The patient is extremely warm. 2nd. The water is extremely cold; and 3d. A large quantity of it is taken into the body. The tioned."

"_"The following symptoms generally follow, where cold water has been taken under the above circumftances." " In a few minutes after the patient has swallowed the water, he is affected by a

dimness of sight, he flaggers in attempta ing to walk, and unless supported, falls to the ground; -he breathes with diffi-When young in life, nor known to sor- culty; a rateling is heard in his throat : his nottrils and cheeks expand and contract in every act of respiration ; his face appears suffused with blood and of a divid color, his extremities become cold, and his pulse imperceptible; and unless relief is speedily obtained, the disorder terminates in death in four or five mimutes. Punch, beer, and even toddy, Then never wak'd mine eves to weep, when drank under the same circumftances as told water, have all been known to produce the same marked and fatal effects." " I-know of but one certain re-Notreach'rous friend hip then had found medy for this disease, and that is Liquid Laudanum. The doses of it as in Nor Death's firead power had rent the cases of spasm fhould be proportioned to the violence of the disease. 'From Hope spread her fair illusion round me, a tea-spoonful to near a table-spoonful have been given in some inftances before relief has been obtained. Where the Of Arlington House, in the District of powers of life appear to be suddenly suspended, the same remedy fhould be used which have been so successfully employed in recovering persons supposed to be dead from drowning."

"If neither the voice of reason, nor the fatal example of those who have periflied from this cause, are sufficient to produce reftraint in virinking a large quantity of cold liquors, when the body Dear days of bliss ye wake my sorrow - is preternaturally heated, then let me advise to-11t. Grasp the vessel, 'out' of nute or longer with both your hands ; this will abitract a portion of heat from the body, and impart it at the same "time to the cold liquor, provided the 'vessel is made of metal, glass or earth for heat follows the same laws, in many inflances, in passing through bodies with regard to its relative velocity, which we observe to take place in electricity-2nd. If you are not furnished with a cup, and are obliged to drink by bringing your mouth in contact with the much annoyed by a fellow, who in every thream which issues from a pump or spring, always wath your face and hands previously to your drinking, with a little of the cold water. By receiving the, thock of the water first upon those parts. of the body, a portion of its heat is conveyed away, and the vital parts are thereby defended from the action of the-

GOOD CIDER. Directions for making sweet cider, that

shall retain a fine vinous flavor, and keep good for a long time in casks, like

There are persons in this country who have for years paft been in the habit of making a particular fine, rich and sweet cider, which they sell from 6 to 10 dolars per barrel ;--- the method of doing it

The writer of this being acquainted with the art and desirous that all cider makers may profit by it, takes this method to make it more generally known.

It is of importance in making cider, that the mill, the press, and all the materials be sweet and clean, and the ftraw clear from muft. To make good cider, fruit should be ripe, (but not rotten) and when the apples are ground, if the juice is left in the pumice for 24 hours, the cider will be richer, softer and higher cooured; if the fruit is all of the same kind, it is generally thought that the cider will be better, as the fermentation will certainly be more regular, which is of importance. The gathering and grinding the apples, and pressing out the juice, is a mere manuel labor, performed with very little skill in the operator; but work shall be comprised in two large oc- here the great art of making good cider tavo volumes, each to contain about 680 commences, for as soon as the juice 18 pages, durably and subftantially bound, pressed out, nature begins to work a price to subscribers 3 Dolls. 50 Cts. each wonderful change in it. The juice of volume, payable on delivery .---- It fruit, if left to itself, will undergo three shall be printed on a fine wove paper, on diffinet fermentations, all of which change the quality and nature of its fluid. The first is the vinous, the second the 5 Subscriptions received at the of- acid, which makes it hard and prepares it for vinegar; by the third it becomes putrid. The first fermentation is the ony one the juice of apples thould undergo to make good cider. It is this operation that separates the filth from the juice, and leaves it a clear, sweet and vinous liquor. To preserve it in this flate is the grand secret: it is done by fumigating it with sulphur, which checks any in its fine vinous ftate. It is to be wifhed throughout the United States will con- that all eider makers would make a trial of this method; it is attended with no expence, and but little trouble, and will have its desired effect. I would recommend that the juice as it comes from the press, be placed in open beaded casks or vats; in this situation it is moll likely to undergo a proper fermentation, and the person attending may with great correctness ascertain, when this first fermentation ceases; this is of some importance and mult be particularly attended to. The fermentation is attended with a hissing noise, bubbles rising to the surface and re forming a soft spunge cruft over the liquor. When this cruft begins to crack, and a white froth appears in the cracks level with the surface of the head, the fermentation is about flopping. At this time the liquor is in the fine genuine clear state, and must be drawn off immediately into clean casks ; and this is the time to fumigate it with sulphur. To do this take a ftrip of canvas, about two inches broad and twelve long, and dip this into the melted sulphur, and when a few pails of racked cider are put into the cask set this match on fire and hold it in the cask set this match sumed, then bung the cask and fhake it, that the liquor may incorporate with and retain the fumes; after this fill the cask, and bung it up. This cider thould be racked off again the latter part of Fe-bruary, or first of March; and if not as clear as you would wifh it, put in isin-glass to fine it and ftir it well-then put the cask in a cool place, where it will not be diffurbed, for the fining to settle. Cider prepared in this manner will keep sweet in casks for years.

> It is certainly of great importance to the people of America, to cultivate the men and absolutely necessary to the supfruit, that is natural to the soil of this port of a republican government. colintry, and to make the most of the fruit which that soil produces : especi-

ally, when its produce is an article of value and of great consumption in this country. A lover of good cider.

REPUBLICAN MEETING. At a very numerous meeting of Republican Citizens, of the Second Ward, in the city of New-York, convened by previous public notice, at the long room of Abraham B. Martling, on Tuesday evening, July 12, 1808-THOMAS NIXON was called to the chair, and Jo-NATHAN THOMPSON chosen secretary. The following resolutions being read, and approved, were passed unanimously, with the exception of only one dissenting voice.

Whereas it appears to this meeting reasonable and consiltent with the principles we profess as republicans, and also essentially necessary to preserve the harmony and union of our party, that when a difference of opinion arises among ourselves, in regard to particular men, the minority should yield to, and acquiesce in the opinion of the majority, whenever such opinion has been fairly ascertained; and whereas a large majority of the Republican members of Congress have in conformity with usual practice nominated and recommended [AMES MADISON for the office of President, and GEORGE CLINTON for the office of Vice President. of the United States ; and we believing there is no mode better calculated to ascertain the sentiments of the republicans of the United States on this important subject; therefore,

Resolved, as the opinion of this meeting, that JAMES MADISON is the only "rightful" republican candidate for the office of President, and that GEORE. CLINTON is the only "rightful" reublican candidate for the office of Vice President of the U. States; and we do therefore cordially acquiesce in their nomination.

Resolved, as the sense of this meeting. that the present opposition to the nomination of Mr. MADISON, "has a tendency to profirate the dignity of the flate -to excite disorder-to dellroy the respect of the community for its public functionaries-to weaken their faith in a republican form of government, and to cause it to be believed that every political ftruggle is a mere conteft for office, and not a contett for principles."

And whereas we have for some time paft with great indignation observed cer-tain publications in the newspapers print-ed in this city, entitled "American Citi-zen" and "Republican Watch Tower," which under the garb of republicanism are not only endeavouring to excite local prejudices, but also propagating the most pase and infamous calumnies against the president, congress and the heads of departments; and "after repeated proofs of the unfhaken patriotism of the people, vainly attempting to deftroy their confidence in their public agents by exagger-ating the effects of the embargo, while fludiously concealing the causes that led to it," and which fill render it indispensable; Therefore,

Resolved, as the sense of this meeting, that the "American Citizen" and "Republican Watch Tower" edited by James Cheetham " are not any longer considered by us as republican papers, and that they ought not any longer to be effected as organs of republican opinions."

Resolved, as the opinion of this meeting, That the authors and propagators of certain late publications, representing the uniform and independent Republicans of this city as Jacobins & disorganizers, and comparing them to a Parisian mob. merit "the contempt and abhorrence" of every republican.

Revolved, That we consider the right "of assembling together openly and pub-licly, and discussing freely the conduct of public men and measures, and ex-

pressing our resolution and opinions to the world," an inherent right of free-THOMAS NIXON, Chairman, JONA. THOMPSON, Secretary.
