Carding Machine.

HF subscribers inform the public that their Wool Carding Machine at their mill, formerly owned by Henry Seibert, on Opeckon, one mile from Smithfield, is now in the most complete order for breaking and carding wool, having procured a new set of cards, and from the superior quality of their machine, they have no doubt of giving general satisfaction; and when the wool is good, well picked and greased, they will warrant the work well done. Their price for carding and rolling will be eight cents per pound-for breaking only, four cents per pound. About 1 lb. of grease to eight or ten pounds of Winchester Rendezvous, wool must be sent when the wool is not greased at home, and a sheet to contain the rolls must be sent to every twenty pounds of wool. We will re-ceive in payment all kinds of grain, at the market price.

WAR WITH ENGLAND.

" Firm united let us be,

" Rallying round our liberty-" As a band of brothers joined,

" Peace and safety we shall find."

The vastly interesting question which hath occupied the deliberations of Congress for several days past, is now settled. That honorable body, after solemn debate and consideration, have decided that peace can no longer be maintained with Great Britain except at the expense of our invaluable rights. Therefore they have raised the arm of resistance to her encroachments-and like our fathers in '76 resolved to draw the sword, and no long-

plunder and insult. This solemn question having been decided on by the legitimate authorities of our country, may we not hope that the disgraceful dissentions which have sprung up in every part of our ope that all party spirit will be sacriiced on the altar of patriotism, and all political distinctions lost in the proud name of AMERICANS! Notwithfreedom of speech and of opinion. But | the bull did with the bull dogs ! on a question of war with ANY foreign

To conclude -As our government

have solemnly resolved that they will

no longer be tampered with in negociation—no longer patiently put up with the wrongs of G. B. and have really drawn the sword to avenge our wrongs under the blessing of Providence, let us no longer be stigmatised as a DI-VIDED PEOPLE—but in truth and reality become " ALL REPUBLICANS, ALL FEDERALISTS." Let Great Britain no longer calculate upon our divisions, and upon a party in our own bosom .-Let every AMERICAN rally round the standard of his country. Those who now calculate upon divisions on this great national question, because we have hitherto been divided on minor questions, will find themselves deceived. To such we recommend the anecer tamely to submit to man stealing, dote of the English nobleman, who resided in France at a certain period of history. This corps of volunteers, which has so long, and under all vicissitudes, maintained a high reputation for pa-triotic ardor and correct subordination, has answered the public expectation at this eventful crisis. A short topographical description of

northward, west of the Mississippi its boundaries have been vaguely defined. To the Northward it is bounded by Hudson's Bay, in the 49th parallel of north lat. extending due west indefinately. Upper Canada is considered the most fertile soil, belonging to the British in that quarter. The rapid improvements in agriculture and the advancement of manufactures, are justly attributed to the activity and enterprize of the American farmers; who, from grants of crown lands have been induced to settle in great numbers in that Province. Indeed Upper Canada would be considered as a territory belonging to the United States, from the immense difference which exists between the industry of its inhabitants and those of Lower Canada-from and from the value of their farms and Several Scotch settlements are formed there, whose farms are in a high state of cultivation. Upper Canada is divided into 19 counties. York, the seat of government, is in about 43 degrees and 45 minutes of north latitude. It is handsomely laid out, and has an excellent harbor, which discharges its waters from the Don and Humber into Lake Ontario, within two miles of the city. York is furnished with commodious block-houses, arsenal, &c. which are principally built on a peninsula called Gibraltar Point. Vessels of all sizes may be built here. Several British vessels of war have already been finished at this point, which now navigate

Kingston, at the head of the St.

next important town in Upper Canada. It is situated in 44 degrees and 8 minutes of north latitude, and in 75 degrees 41 minutes of west longitude .-It has barracks for troops, with several store and block houses. The king's ships winter at this place, and likewise all the batteaux which navigate the St. Lawrence and convey military stores from Montreal. The military force and power of Upper Canada are objects of the least attention. Possessing no important point or key to the province, the forts and other armaments are scattered in various directions; and none of them possess sufficient strength and importance to hold out against a superior and active force. Fort Malden is the first point of any importance to which the activity and courage of the Ameria ricans will be directed. Fort George and the fort at Niagara are in a like manner weak and inefficient. To subdue Upper Canada with little loss, will demand an effectual force, whose operations being directed to many points, will have to be prompt and decisive to insure success. All enterprizes wherein the subjugation of a country is contemplated, should be carried on with ittle or no delay, when once undertaken. Military operations, when prosecuted with vigor, spirit and determination, if correctly planned, will generally prove successful; and from the situation of Upper Canada, no doubt exists of its falling immediately into our hands, if the force is of sufficient magnitude and conducted by experienced officers. It is essentially necessary that Upper Canada should be the first object of attack, in order to ex-terminate, at one bold, determined and decisive blow, the horde of remorseless savages and their inhuman abettors, whose massacres and barbarous murders have lacerated the feeling heart, and aroused the vengeance of an injur-

Inportant to agriculturalists .- A gardner at Gl sgow practices a mode of destroying caterpillars, which he discovered by accident: a piece of woolen rag had been blown by the wind into a current bush; and when taken out was found covered by the leaf-devouring insects. He immediately placed pieces of woollen cloth in every part of his garden and found the next day that the caterpillars had universally taken to them for shelter. In this way he destroys many thousand every morning .- Bell's W. Messenger of April 6.

SECOND EDITION. Courier Office-Half past six. "We have just learnt that his majesty's ministers have all sent in their SECOND EDITION OF THE GLOBE.

Sun Office, two o'clock. We have just heard that the members of the present cabinet have declined taking any part in the new arrangement that may be made. The new cabinet, it is said, will consist of the marquis Wellesley, Mr. Canning, the marquis of Lansdowne, Lord Holland, lord

Moira, and Mr. Huskisson. The marquis of Wellesly to be first lord of the treasury, Mr. Canning, lord Holland and the marquis of Lansdowne, the three secretaries of state, Mr. Huskisson, chancellor of the exchequer, and lord Moira, lord lieutenant of Ireland.

The Flemish fishermen report a great battle between the Russians and French, which lasted two days-the place is not stated, nor the result dis-

tho' the authenticity is very doubtful. We stated yesterday, that a formal notification of the repeal of the Berlin and Milan decrees had been made to our government, and we this day lay before our readers the extraordinary document by which the French emperor has thought fit to make his determination public. It is dated the 28th April, 1811, that is to say two months after the Americans had enforced their non-intercourse against us exclusively. Although there is an evident juggle in this affair, we cannot see how the British government can refuse to rescind the orders in council, to which they stand most solemnly pledged. The French will no doubt, continue to burn, sink, or destroy American vessels as often as they meet with them, notwithstanding the revocation of the Beilin and Milan decrees; and the Americans must seek redress in the best way
