This movement of the marshal's rendered necessary a corresponding movement on my part ; and I retired from the farm of Quatre-bras upon Genappe, and thence upon Waterloo, the next morning, the 17th, at 10 o'clock. The enemy made no effort to pursue

This gave lord Uxbridge on opportunity of charging them with the 1st life guards, upon their debouche from the village of Genappe, upon which occasion his lordship has declared himself well satiefied with that regiment.

FRENCH HOUSE OF PEERS. Permanent Session, June 22, 1815.

M. Lacepede, in the Chair. The Minister of the Interior, demand. d to speak in the name of the Emperor. He then read the following Declaration

of the Emperor, to wit : Declaration to the French People.

FRENCHMEN!

When I commenced a war for the prehad reason to hope for success, and I braved all the declarations of the allied powers against me. Circumstances seem now to be changed. I offer myself a sacrifice to the hatred of the enemies of France. May it prove that their declarations were sincere, and that all their enmity is directed against my person !

My political life is ended; and I prolaim my son, under the title of Napoleon 11. Emperor of the French.

The existing Ministers will form proisionally a Council of Government .---The affection which I bear to my Son, induces me to invite the Chanibers without delay to organize a Regency by law .---Unite yourselves for the public safety, and preserve the Independence of the nation.

FRENCH OFFICIAL ACCOUNT OF THE BATTLE OF THE 18th.

Moniteur. We have not room to point out the va-

rious positions of the armies in the engagement of the 16th, from which, however, it appears, that the left, the right and the reserve were equally engaged at a distance of about two leagues

The 17th, at ten o'clock in the evening, the English army occupied Mount Saint John with its centre, and had its out-posts in advance of the forest of Signes. Three hours would have been required to attack it. It was, therefore, necessary to defer the attack to the following day.

The head-quarters of the emperor were established at the farm of Caillion, near Planchenorte. The rain fell in torrents.

At nine in the morning, the rain havng somewhat diminished, the first corps out itself in motion, and took post with its left on the Brussels road, opposite the village of Mount Saint John where appeared to be the centre of the enemy's position. The second corps supported its right upon the Brussels road, and its left on a small wood, within reach of the English cannon. The cuirassiers held themselves in reserve in the rear, and the guard were also in reserve upon the heights. The sixth corps with the cavalry of Gen. D'Aumont, under the orders of Count Labau † was ordered to take post in rear of our right, to oppose a Prussian corps, which seemed to have escaped from Marshal Grouchy, and to intend falling upon our right flank ; an intention, which had been made known to us by our reports, and by a letter from a Prussian general, which had been taken by our scouts.

The troops were full of ardor. The force of the English army was estimated at 80,000 men, and it was supposed, that
