Mr. Ravenscroft, from the committee on the state of the church, made a report. Bishop Moore delivered the following ad-

dress on the state of the church: Brethren-To effect great and important objects, great and continued exertion is required Difficulties must not be permitted to paralize our efforts nor to unnerve our arm The mind fixed upon a legitimate point, must put forth all its energies in the attainment of the contemplated design. To press forward towards the mark, & to preserve will firmness, can alone secure to us success, and effect the completion of that hallowed object in which we have engaged, the resuscitation of the church of our fathers.

When travelling through this extensive diocess, fatigued with the labours peculiar to the station which I occupy, my spirits are always revived by recurring to that noble principle which forms the soul of this convention, and which animates the bosom of each individual member. It is to raise our Zion from the dust, to build up her prostrated altars, and to furnish the people of our communion with the bread of life that we are laboring. Jehovah from his throne of mercy looks down with approbation, and whispers to our ears, "well done good and

faithful servants." When the ruins of our desolated temples meet my eye, and the religious privations of the people are presented to my view, my peculiar to the case. Brethren, we have much cause of gratitude to God for the mercies conferred upon us; and though all has not been done that we could have wished, still enough has been effected to convince us that the Lord is with us, and that Jenovah smiles upon our efforts. Remaining at home a fortnight, I again left my parish the last of June, on a visit to some of the lower counties. In New Kent I preached to an attentive congregation in the old parish church of St. Peter's. Among the listof worthies, who have exerted themselves in the building of the church in Fayettiville, I find the names of Cameron and Waslow, the sons of two of our deceased clargy. May the spirit of their fathers continue to animate their bosoms, and may the children of other ministers imitate their noble, their laudable exam-

" REMARKS BY THE AURORA.

As some of our readers may be carious to know something about this inscription, more plain than what is given in the eastern papers, we give the following explanations:

On the 13th September, 1768, Messrs. S. Sewall, Thomas Danforth, William Baylies, Seth Williams, and David Cobb, discovered, on a large rock, on the margin of the sea, at Dighton, in Massachusetts, an inscription in strange characters. This inscription had in a prosperous condition. I preached in been the subject of common conversation for more than fifty years, but was considered as some rude work of the Indians who had inhabited that quarter Those citizens made a copy of the inscription, and copies were multiplied and sent to many learned men and learned bodies, in different parts

Many attempts have been made to decycurate copy of it before us-and have made Bre hren animated with the disposition of several attempts at interpretation and decyof the characteristic forms of the San scrit left; but the story, for it appears to be an embarked, and let us redeem that pledge | historical record, begins on the left, and proceeds to the right, there being, apparently, three acts, referring to the past, the present, and the future, and signifying whence the authors of the inscription came, their number, and intercourse with the natives, and their intent on to return whence they came: it is not possible to transcribe it without a drawing, but the apparent subject is, that the inscription was of persons, by sea from the eastward, who, on landing, paid their first devotions, to the divinity of the country whence they came, that is Boodh, or the genius of fecundity; also a symbol of Minerva and Isis. The head of a hawk indicates infitite wisdom, and also the north wind, which conducted them to the spot; there are some other figures and letters,

which admit of many interpretations. The second scene which is in the then present, is more diffused, and the figures dispersed; there is a vessel with its masts, flags, and long rudder, as in the oriental vessels at this day-there is a figure of a horse, which is the well known symbol of Carthage. There is a human figure, or bust, upon the breast of which is a TRIDENT, emblematic of Neptune and also of the oriental trinity, of the good and evil, and of the mediatory powers; the same as Vichenou, Sieb, and Brama, which, under one or another name, have been found in the religions of

The subject generally appears to be intended to commemorate the arrival of a people there from the ocean and the east, and who, having had intercourse with the natives, had resolved to return, and had written thus on that rock, to commemorate that event: the characters indicate an oriental origin; but whether from Phænicia or Carthage, or elsewhere, is not ascertainable than that it is of great antiquity; that it is a record of some kind, cannot be a moment doubted. Though the hieroglyphics are many and crowded, yet there is a method in it which renders it, beyond doubt, intended to communicate facts, and the oriental characters are to be found in nearly all the eastern alphabets.

From the Norfolk Herald of May 24. FROM GIBRALTAR

We learn from Gibraltar, that orders have been issued by the Spanish authorities. for a hot impressment in all ports upon the Coast of the Mediterranean, to obtain sailors to man the ships which are to convoy the grand expedition to Buenos Ayres, and is expected every day to be enforced in Cadiz and other ports in that quarter. It is believed that this measure will not be very well relished by the poor sailor when a more civil way of procuring officers meets with the most marked opposition. We are this city, a man by the name of DARBY, informed from the most unquestionable authority, that no less than six. different com- last, in Christ Church Parish, murdered his manders have been ordered to the San Tel- own wife -Justice though slow, is very mo, 74, one of the ships intended to accom- sure-for, as in this instance, it would appany the expedition, and that all of them re- pear that this man from the length of time fused to act. The plea for this refusal is, not from any fear of the patriots, but a be- bie deed, and the precautions made use of to loyalty of those who are destined for South nals-and perhaps had altogether forgot America, is lost."-"The King," say they, these emphatical words of the Holy Scrip-"is losing his power, and we our honor."

Until these ships arrive, but little can be done towards the completion of the expedition. In the mean time we were told, that the impudent Patriot privateers are daily peeping into the harbor of Cadrz. A Buenos Ayrean privateer of 22 guns, was cruizing off Cadiz about the mid-dle of March, occasionally taking a "bird's eye view" to learn the progress of the expedition, and intercepting vessels in the very teeth of the batteries. A strong reinforcement of these troublesome customers was soon expected, when the tranquility of the waters of the Mediterranean will no doubt be disturbed, than which nothing could be more practicable, and nothing better calculated to bring home to the "business and bosoms" of the Spiniards, the wretched situa-

tion of their affairs. We further learn that Mr. Wm. D. Robinson, (whose release from confinement in Cadiz, on his parole; we announced a few days agon has made his escape from that place and arrived at Gibraltar. It appears that as soon as Mr. Erving knew of his arrival at Cadiz, he immediately commenced a negociation with the Marquis de Yrujo for Mr. R's release from captivity; and through the intercession of the American Consul at Cadiz, the Governor was prevailed upon not to remove his prisoner from Cadiz, until further orders from Madrid-meanwhile Mr R. obtained a personal interview with the Governor, with whom his eloquence prevailed so far as to obtain for himself the indulgence of a parole On the 14th of March he was secretly informed that orders were received from Maurid, severely reprimanding the Governor for his generosity to Mr. R and commanding him to put into immediate execution the order before confided to him, directing the prisoner to be sent to Ceuta; he was further informed that the Town Adjutant with a guard was then i in pursuit of him. The recollection of his 30 months of the severest hardships of captivity rushed upon his mind and determined him to fly from his Parole. He effected his escape on the same day, in a vessel laying in Cadiz bay, the captain of which, with a benevolence of heart which does him infinite honor, set sail immediately, against a head wind; and thus Mr. Robinson bade adieu to Spanish castles, jails and dungeons, to inhale once more the wholesome air of his own native land of liberty.

The following facts we believe are unknown in this country; their authenticity, however, is not to be doubted: At the capture of Gen. Mina near Mexico, about 75 of our countrymen were taken prisoners, of whom were Lieut. Larkin, of Virginia, and Lieut. Hutchinson.-The fate of Mina is well known, though the Patriot General, second in command, offered 42 Spanish commissioned officers, then in his power, for Mina's release, amongst whom were two Lieutenant Colonels, "If," said Apadoca, the Viceroy of Mexico, "you had forty thousand to give in exchange, I would not spare General Mina." He was accordingly shotand so were the 42 Spanish officers in retaliation. In the progress of this fit of vengeance, our two countrymen, Larkin and Hutchinson, were formally and publicly shot; the rest were confined in a damp and dismal dungeon, to which the black hole of Calcutta would have been comfortable; of these, 45 perished in a few days of pestilential air!-The remainder were transported to another dangeon only to prolong their sufferings, of whom four were afterwards sent to Spain, and are now on the coast of Barbary; they are believed to be the sole survivors of the whole party !- Yet the minister of H. C. M. had the effrontery to talk about the "profound indignation" of his master, at the execution of Arbuthnot and Ambrister! And yet our own newspapers ver, our very Members of Congress could taking away the lives of these two individuals!

BALTIMORE, May 29. About 3 weeks since, three men named Cotterill, the father and two sons, and a man named James Adams, who had just arrived at this port, in the ship Ceres from Liverpool, went together to work on the Cumberland turnpike road. Adams had bro't with him from England, a considerable sum of money and a draft on some mercantile house in Baltimore, with which it was his intention to have purchased a farm. Two days after they commenced their labor on the road, Adams missed his draft, and being in doubt whether he had lost it on the way, or left it in his trunk at Baltimore he resolved to return here to search for it, and

NEW-YORK, MAY 25. RAPID TRAVELLING. It was suggested a few days since that a trip might be possibly made to Philadelphia and back again in one day. Accordingly a party of gentlemen, left this city yesterday morning, in the Post Chaise Line across Staten Island, arrived at Philadelphia, partook of some refreshment at the Mansion House, and returned to supper, at Niblo's before nine o'clock, performing with ease, a distance | Captain Wooster now commands. The heretofore unknown in this or any other country. The party consisted of five, exclusive of the proprietor and driver, and left the quarantine ground precisely at 3 o'clock; arrived at Woodbridge, at 24 minutes after 4; at Brunswick, at half past 5; at Princeton, at 11 minutes past 8; at Bristol, at 10 minutes past 9; and in Philadelphia, at 11, and the New-York morning papers were delivered in Philadelphia at that hour; the party in returning reached the quarantine ground at 8-starting at dawn and getting back at dark, and completing a distance of 160 miles, exclusive of 18 miles by water, in one day. This has never been equalled, and the horses went at a pleasing trot-no racing or gallopfind no parallel to Gen Jackson's cruelty in ing, and very little fatigue was sustained. This effort is highly honorable to the enterprize of the proprietors of the Post Chaice Line, who merit encouragement for their despatch, and the comfort and convenience of their stages. Twenty five minutes were alloted to dinner at Philadelphia.

Among the applicants for pensions was Lt M. who obtained his title by his valor. His declaration was made out in due form, and certified by the judge, who knew him well, and could safely attest his merits and write his name, and, in signing the necessary documents, he could only make his mark. At the storming of Fort Montgomeing off a cannon, loaded to the muzzle with every kind of missile, when a shot carried away his arm, and the match dropped upon the ground; he immediately seized it with ry point, and the very instant the British were entering the fort, which swept down a whole phalanx of the foe. For this heroic action he was honored with a commission; but in his old age he could not write his name with his left hand.

Another of these venerable men, trembling with age, applied for the necessary papers to obtain a pension. The Judge inquired where he had served. "Why, first, (said he,) in the old French war." Ah, says the judge, you cannot obtain a pension for services at that period. Did you serve in the Revolutionary army! "O yes, I served all the war. I was at the battle of Bunker's hill-afterwards at Long Island, and the capture of the Hessians at Trenton-I was at the attack of Germantown, and at the battle of Monmouth-and finally, at the capture and seige of Yorktown, in Virginia; and," added the old man, his eyes rekind-ling with the fire of 1776, "I was the first American sentinel placed at the quarters of Lord Cornwallis, after he was an American

FROM THE AMERICAN FARMER. A correspondent suggests, that we were

grossly misinformed as to the effect of snade and sun on the fly, in tobacco beds, and we incline to think we were; though the suggestion was made by a gentleman of much experience and undoubted integrity; he was of opinion, that the fly delighted and prospered in the sun, and that shade would kill or drive it away. Now, it is a well known fact, that they thrive best, and are most destructive, in dry windy weather We often see that hints thrown out in season, lead to valuable discoveries: so will it be, we believe, with what has been said of sas-SAFRAS WOOD; several intimations addressed to us since, in letters, and in the course of conversation with gentlemen from different quarters, fully convince us, that the ori- ful) fact, that this country, blessed beyond any that 1. Since we threw out the suggestion, that, by a proper use of this discovery, the fly might be destroyed in tobacco beds, we have been informed, that branches of the sassafras tree thrown over the bed, will destroy them. It is an ascertained fact, that the dry bark of sassafras, pounded and sprinkled in the hair of any lousy animal, whether biped or quadrupid, will cause the lice to disappear immediately after the first rain. Chips or the bark pressure; or rather it was their multiplication of it thrown into the beds of hogs, will have | which principally contributed to mismanagement.

The circumstance which originally led to | could make little dividends, and their stock must sell the discovery that it would drive away, or destroy chicken lice, was from its being observed that a bedstead was never infested by

them, which was made of that wood. We are inclined to think the most effectual application of it, is, in a state of decoction. A respectable, planter, in Calvert county, effectually destroyed the fly, since we made the publication, by brimstone and sassafras, but knows not to which to abscribe it; all are easily applied, and this flea-skipping fly is as great a barier to the raising a supply of plants, as the Hessian fly is to making a crop of wheat.

A wild intriguing, chaffering, subtle spirit of speculation has taken the place, too frequently, of a patient and honorable industry. We wanted to take short cuts to fortune. We would not stoop to work hard for pence and shillings, when we saw our adventurous neighbors accumulate thousands of dollars by a bold or cunning stroke of speculation. Economy, too, was deserting us, as well as industry. We must live high, drink the costliest wines, dash out in the finest equipages, build demi-palaces, and furnish them in the most sumptuous manner. Our manners were silently corrupting; our republican principles were undermining. Wealth, fashion, aristocracy in expenditure, were becoming the orders of the day. To-give further scope to speculation, or extravagance, when these banks began to be more reserved in their favors, we began to bend may constitute a nation. Now serving with the Insurgents. The government of H. C. M. and I in particular, im informed of the manner in which many of H. B. It is represented by those revolutionary agents that there exists a well established Republican Government, laws, armies and populations who have establishing themselves in this country, of knowing the Supreme Chief, and of obtaining as a reward for their services, properties, fortune and honor: but how miserably have they been deceived,

Englishmen! to you I address inyself who are already acquainted with that famous personage whom you no doubt (while in England) compared to a Washington at least, but now, having seen the Hero of this despicable republic, his troops, his generals, and the wiseacres who compose his Government, you must be convinced of having been most shamefully imposed upon. You are serving under the command of a man in every respect insignifi-cant, and have joined a horde of banditii who are famed for the exercise of the most barbarous cruelties, which are so averse to your national character, that you must abhor them.

He who retains the least spark of honor and jus-tice cannot remain united with such a band of ragamuffins, who are abhorred by the very country that gave them birth, whose soil they have sullied
