SELECT & CLASSICAL SCHOOL. THE subscriber proposes to open a Select and Classical School at Wheatland, Jefferson County, Va., on the first of October next. He will, himself, be the instructor, in the Mathematics and other English Branches, and in the French, to such as may desire to learn that language. The Latin and Greek will be taught by an accomplish-ed and well qoalified instructor. The course of instruction in the several English Departments, and the text book used, will be modelled upon those of the West Point Academy, of which the subscriber is a graduate. In the latin and Greek, approved text books will be used. The subscriber deems it unnecessary to those in his negliborhood, but to those at a distance it may be proper to say, that Wheatland is a retired, healthy and most favorable situation for a school, within a few miles of Charlestown, through which the passes the Harpers-Ferry and Winchester Rail-road.

MYSTERIOUS AFFAIR.—On Monday, evening last, an elegantly dressed young lady got into one of the Yorkville omnibuses in the Bowery and went out to Carter's Hotel. She was shown into a back parlor, where she remained a long time without calling for any thing or speaking to any body, when at last Mr. Carter, being suspicious that there was something wrong, went in and told her that if she wished to remain in his house all night he could accommodate her with a pri-vate room. She replied that she would not re-min there long to trouble him or any body else, as she would very soon die. Mr. Carter then young lady had swallowed a large quantity of laudanum; an ounce and a half vial was found under the table empty. An officer of the police and a physician were immediately sent for, and by means of the stomach pump her life was saved. She has since refused to diclose her name er give any clue by which her home may be known or her motives for attempting to destroy her life. She still remains at Carter's Hotel, in Yorkville.

the truth is, so far, no moral incentive has yet

than its profits in Virginia. J have been aided in these estimates by an intelligent commercial friend of Richmond, and though they profees to be but approximations to truth, they are perhaps near enough to it for all practical purposes. It may however be conceded, that, in Louisiana, a larger portion of the negroes are working hands, and some allowance should be made on this account; yet after all, the difference in the rates of profit between the States is enormous. But that there may be no mistake, let us look at this subject from another point of view. From personal observa-tion, aided by the strictest enquiry. I believe that a hand on the good sugar lands of Louisiana, will produce, on an average, six hogsheads of sugar, weighing 1000 pounds each, which at six cents per pound, the present price, is \$360 00 And 240 gallons molasses, at 25 cents, 60 00

chi and when a not a hind of tobacco 23 00 to market. 14 00-making together. 20 00 Would leave a profit for each efficient hand of \$100 00. This is far beyond the average yield in the States of North Curolina and Virginia, at least in our section of them, but may be assumed, and them the profits of the Virginia and Louisians planters, are to each other in the ratio of of \$100 to \$300. If we were to state the average dispartively, in the ratio of three hundred and twenty, to seventy-flew, we should be much nearcr the truth. The inference seems to be very clear, if there calculations, that a large portion of our negroes should be sent to the Southwest. This removal of man who works eight or ten hands, and lives on his land, with his family, gains a considerable profit in having his own wants supplied. He consumes all his corn, most of his wheat, bis beef, his pork, and his family. In short, he has, to all intents and his family. In short, he has, to all intents and his family. In short, he has, to all intents and his lamb. His would not be better off, by the sale or removal of his negroes. But I doubt whether every man who owns more than ten work, ing hands, would not be better off, by the sale or removal of all beyond that number. But shall we profit may be said—shall we part with so large a portion of our labor, and leave our lands to wasto? Certainly if the labor be unproductive, it is folly to physical strength of the country, and if his labor be profities, of course he is a nuisance, and the sooner we rid ourselves of him the better. RomANCE IN REAL LIFE.—About twelve years ago, a young gentleman, whose name we forbear to manlion, residing in an interior county of Ken-tineky, became smitten—as falling in love is usu-ally termed—with the daughter of a wealthy mer-chant. His love was requited by the fair and lovely girl, but the young man being poor, with-out influence, and having nothing to depend upon but his own industry and resolution, his suit was looked upon with a favorless eye by the wealthy father. In a moment of chagrin and disappoint-ment, the proud youth left the home of his child-hood—and twelve years rolled by ; during which time no word was heard of him. He went to the West Indies, a pennyless adventurer, and one month since returned home, the possessor of an immense fortune. Not oven a declaration of principles-nor a committal as to one single policy of Government is to be required-from the expected leader of this forlorn band. But will they not have to retrace their steps-take back all those wild declarations as to independence of party trammel, and party dictation ? We predict they will, and those who may give attention to our neighbors of the " Free Press," will find them in a few short months, performing on the political chess board, scenes never hear from. Although the groans of the wounded is no un-usual sound to hear, yet we confess our surprise at the following groans from a paper which may gus,) gives the Democracy one majority over all be ranked among the Victors, so far as the strength of parties in the next Congress is concerned. They proceed from the " Boston Whig," the editor of which evidently anticipates seeing " a confu-sion terrible to look upon," among his Whig friends in the next House of Representatives. selves: The result of the election thus far shows the likelihood of a return of a small majority of Whigs to the lower House. But the number will not probably exceed six or eight and it will include men who hold the most opposite opinions. On the one eide, for example, is conneld as a Whig, Mr. Tack; on the other, Mr. Hilliard. Now we should like to know what single principle these gentlemen hold in common which will keep them one moment in union upon the issues to be present-ed to this Congress? Then there is Gen. Bar-ringer, a slave-holding Whig of North Carolina, and Mr. Giddings an anti-slavery Whig of Ohio? How are they to be reconciled to the support of a common system? One class of men like Mr. In-gersoll and Mr. Winthrop, however much opposed to the origin of the war, are ready to furnish sup-plies to prosecute it to a successful termination, whilst another class such as Mr. Hudson and Mr. Root, will yield nothing for such a purpose.— Among such difference of opinion, where is the probability that a party which needs the co-opera-tion of every one of its members to give it a ma-jority will stand ready to assume the responsibility of a positive system? If it were so disposed, we should doubt its ability, and we must in candor add, we have serious distrust even of its disposi-tion. UNFORTUNATE AFFRAT. The following paragraph which we copy from, the Norfolk Beacon of Saturday last, gives us tidings of a most unfortunate state of affairs existing in Accomac county. We trust, however,

that the matter is much exaggerated, and that the differences said to exist will be speedily adjusted ; FRACAS.—We learn that a fight occurred at Drummond Town, Accomac county, on Monday last, between Judge Bayly, member of Congress, and Mr. Finney one of the candidates of the coun-ty, growing out of the late division of the M. E. Church, in which Mr. F. was shot in the thigh by the Judge. The excitement is said to be intense, so much so, that the Judge, who, it is asid, was imprisoned in the Jail & part of Monday, has been compelled to leave the County, and accordingly took passage yesterday in the boat for Baltimore. Some idea may be formed of the excitement per-vading the county on this subject, when we in-form the reader that one of the Magistrates of the county went on the bench on Monday last, armed with a pair of Revolvers and and a Bowie Knife. armed—he being one of the Justices that was threatened with being taken off the bench and tied on that day; and it was this fortunate circum-stance that enabled him to hold the mob in check; every thing like law and its officers were disro-garded and trodden under foot. The excitement was so great that it was found impossible to go into any thing like an investigation of the matter, and Judge Bayly was lodged in jail for the night. Today the whole matter underwent an investiga-tion, when he was fully acquitted. The evidence made out a pure case of self defence. Three Magistrates were sitting in the case, and they were unanimous in their opinion. Throughout this whole affair, the conduct and bearing of Jodge B, was cool, caim and collected. Mr. J. C. Wise's efforts, as a peace officer, were above all praise; and the writer of this would be doing injustice to his own feelings were, he to omit to and, that in these efforts he was nobly sustained by Mr. Revell West one of the very best officers that this or any other county was ever blessed with. His torn and hattered coat the next morning was the beat evi-dence of his services through this trying affair.— You may be ready to ask the cause of this excite-ment against Judge Bayly. I will answer, in a word, it was Mr. William B. Finpey's defeat at our last Spring election, and the triumphant vote which Judge Bayly obtained in this county for Congress.______Yours, Truly. They have adhered to principle. They have made it paramount to party organization and temporary policy, and they have thus held the balance of power between the two great parties. The New Orleans Delta thus speaks of the wea ther and the fever : The weather for two days past has given us no hopes of the abatement of the epidemic. The ex-cessive heat and strong breezes, which have char-acterized the two last days, create the very atmos-phere upon which the epidemic grows and strength-ens. From the indications on the streets, the constant rolling of innumerable doctors' gigs, the anxious expression of citizens who hurry along the streets, the appearance of sickness in almost every house we pass, the mournful hearses with their small train of mourners, and a hundred oth-er signs, render it painfully evident that an exten-tive epidemic prevails throughout our city. The same thenes elicit the following from the New Orleans National : ticle: The climbing of the Natural Bridge is justly considered one of the greatest feats of the day.— It was first performed by Mr. Piper in the sum mer of 1818, and again by Mr. Shiner a few year ago. Since that time no one has attempted this Herculean task until this morning. Mr. McKune of Lansboro, Pennsylvania, went under the Bridgy with the intention of sketching this wonderful cu-icative, while the groups of the second of the

Mr. McKune, of Lamsboro, Pennsylvania, went under the Bridge with the intention of sketching this wonderlu cu-riosity; whilst thus engaged, he concluded to climb it, and forthwith commenced in the ravine just under the celebrated Cedar stump in the pre-sence of Messrs. Henry C. Boughan, and William Gillis, of Buckingham Co., Va., J. Hotchkiss, of New York, and Master Blake Moore, of Bedford. Mr. McKune began to ascend with celerity.— Soon the first ledge was gained with little difficul-ty; he then wound around the large projecting pillar from which visitors are accustomed to view the Bridge; after pursuing this route some dis-tance in a horizontal direction, he again commenc-ed ascending the second ravine on the left of the aforementioned pillar, going on his way rejoicing, singing, shouting and throwing down stones.— He continued to ascend till reaching the third ledge, which is about 50 feet from the top-fol-lowing this ledge towards the height, which again brought him under the cedar stump, he sat down to rest and collected several specimens of stalac-tites from the place, in all probability before un-touched by human hands. After remaining here about tom minutes, he retraced his stops until he came to the same ravine he had just left. The gentlemen present conlinued to watch his move-ments. Mr. McKune has lost his former buoy-ancy of spirits, he ceases to sing and shout; there is a perfect silence, for ho is at the most difficult point, ascending perpendicularily with but little en-couragement from the storn and projecting rocks around, and a fearful invitation to plunge in the yawning abyse below. Nothing daunted, he still perseveres and by the aid of strong sinew and firm merves, he surmounts every obstacle, and trium-phantly reaches the top of the awful precipice, about fifteen feet from the spot where both Piper and Shiner emerged, amidet the congratulations of his friends and in the presence of J. FRANCE.

FRANCE. There are symptoms, too unequivocal to be mistaken, of a coming rupture between the French people and the dynasity of Lours PHILIPES. The policy of the Government, exclusive and narrow, has been directed to the maintenance of family interestarather than to the promotion of the nation-al good; and it would seem that no means of cor-ruption have been too low or too flagrant for the use of the King and his Ministers, in the endea-vor to smatain the administration under its mani-fest want of popular sympathy. The disclosures of corruption are becoming continual. "Almost daily exposures," says the correspondent of the Boston Atlas, "are made of bribery and pecula-tion, inculgating every member of the cabinet from Marshal Sourt downward." The recent rumor of the assassination of Lou-

from Marshal Soult downward." The recent rumor of the assassination of Lou-is Philipper although nothing but a rumor, crea-ted a great excitement in England as well as in France—for the impression seems to be strong in both countries that the King's death is to be the signal of a revolution. Perhaps that event may not be waited for. The revolution of 1830 did not wait for the death of Charles the Tenth. The conservative of Louis Puri new well. did not wait for the death of Charles the Tenth. The conservative of Louis PHILIPPE, well adapted to the condition of things when he as-scended the throne, was nevertheless of only tem-porary adaptation. It was well to keep France from rushing into war—to check the violence of that ardour which would fain make proselytes to freedom at the sword's point and at the risk of a crusade against all Europe. But though checked and assuaged it was not politic nor safe for any government to attempt an entire suppression of the progressive tendency. That must go on in France. It is wisdom on the part of the govern-ment to understand that tendency and to guide it judiciously. Otherwise it will advance by fits and starts, and every step will be a revolution. for the person who was convicted without having been indiced. In this shameful riot a highly respectable citi-zen of Maryland was killed—his life taken by the negroes of Carlisle, for attempting to recover his property in accordance with the constitution and laws of the land. And yet the principals concern-ed in this outrageous murder have been declared, contrary to evidence given, to be innocent, whilst the jury found guilty those, who, perhaps, had no connexion with the riot—and thus justice is evad-ed. Professor McClintock, according to the tes-timony of several witnesses, encouraged the riot-ers in their violence, but he was also acquitted. It is to be much regretted that any of the citizens It is to be much regretted that any of the citizens of Pennsylvania should not only aid Slaves in ea-caping from their masters, but instigate negroes of that State to violate the laws of the land by asthat State to violate the laws of the land by as-saulting owners who come to seek their runaway slaves. A repetition of scenes similar to that which occurred in Carlisle, would be calculated to excite feelings in the slave-holding states which it is desirable should not exist. Nor is it the init is desirable should not exist. Nor is it the in-terest of the cilizens of Pennsylvania to permit these negro outrages to go unpunished; for the time will arrive, when Pennsylvania will feel the presence of that kind of population to be a curse to their State. The negroes will presume upon their independence, and seek to be placed on an equality with the whites. This will be resisted, and the result may be forseen. We predict that the first serious difficulty between the two races will occur in a free State.—Balt. Clipper.

THE CARLISLE SLAVE CASE .- The Carlisle

Herald states that when the jury handed in their verdict, immediately upon its rendition, Judge Hepburn, with much warmth and feeling, declared that the verdict was one to which the Court felt compelled to declare its solemn protest, adding, that had it been a civil case, the Court would in stantly set it aside as not being rendered accord

ing to the law and testimony. The Hagerstown Torch-Light has a lengthy article in relation to this trial, from which we extract the following paragraph, relative to the remarks of Judge Hepburn :

remarks of Judge Hepburn: "An explanation, as an act of justice to the character of Cumberland county, we take par-ticular pleasure in making. With a noble and manly firmness, which goes very far towards wiping out the stigma inflicted upon justice, by the jury, Judge Hepburn, on behalf of himself and his associates, immediately after the rendition of the verdict, arose and profested in the most positive manner against the verdict of the jury. It was, said he, contrary to the testimony, and if it were a matter of dollars and cents, he would not hesitate a moment to set it aside and grant a new trial. In

DEMOGRATIC PRINCIPLES.—No party, since the formation of free governments, has ever held the power, and carried on a system of measures with formation of free governments, has ever held the power, and carried on a system of measures with such consistency and success as the Democratic party of the United States; whilst the Whigs have changed their ground on almost every political subject except the war, the Democracy have stood firm and undannted upon the platform laid down by the pairiots of '16 and '98. We have been en-gaged in three important wars with foreign na-tions—the war of the Revolution, of 1812, and the present war with Mexico ; in each case the Democracy has stood by the administration, and their country, whilst the tories or federalists have in each instance, proved traitors to their country, giving ' aid and comfort' to the enemy. On the Tariff we have uniformly maintained the revenue standard; as a party we opposed the incorpora-tion of a national bank, and when its corruption became manifest, our great and good Jackson de-stroyed the monster, as Hercules did the fabled Hydra. We have opposed internal improvements by the general government, and a distribution of the income of the public lands among the States ; we have opposed a national debt, as the greatest curse which could befall our country; we have adhered to a sirict construction of the constitution, and preservation of the veto power, as the balance

adhered to a strict construction of the constitution, and preservation of the veto power, as the balance wheel of the constitution. Under such principles we have administered the government for nearly liaif a century, with the greatest success; our in-tellectual and mental progress has been rapid, and general prosperity has attended all branches of business.—Lowell Adv.

And general prosperity has altended all branches of business.—Lowell Adc. MARUFACTURES OF PROVIDENCE.—Providence (Rhode Island) appears to be eminently a manu-facturing town. With a population about equal to the white population of Charleston, it has calloo and calendering works which bleach 108 tons of cotton cloth and print 390,000 yards of calico weekly ; its cotton mills are supplied with 34,000 spindles; its woollen mills weave 375,000 yards of jeans and sattinets annually, and it has 1,800 hands employed in these manufactorics.— There are two wood-screw factories which uso annually 700 tons of iron, and fourteen furnaces which use 5,000 tons of pig iron for machinery, and make every year 5,000 ploughs and 14,000 stoves. There are three ahops for constructing engines; a rolling mill which makes 10,000 tons of railroad iron and wire annually ; 3 India rub-ber shoe factories; s aboe tie and stay lace facto-ry; and one for manufacturing edge tools; be-sides eight ongraving shops. All of these em-ploy 1,647 hands, while the making of cotton and woollen machinery gives employment to 1,200 more. As an evidence of the business done in Providence, it may be stated that for the single items of labor in manufacturing jewelry the sum of \$100,000 is paid annually.

The re-ports of interments in the city during the week ending yesterday morning at 9 o'clock, show a to-tal of 442, of which 311 were of yellow fever.— The reports of the week immediately preceding showed a total of 428 interments, of which 307 were of yellow fever. This shows but a slight increase in the number of deaths, but the number of cases was no doubt very considerably larger the last week than the one previous. The fever pre-vails now among classes better able to withstand its ravages. It is consolatory to know that the ravages of the continued and large imports of breadstuffs, forced upon our markets by the ne-cessities of bolders must exercise a still stronger depressing influence upon the trade, and it may be fairly inferred that the markets have not, as yet, retregaded to anything like the point to which they appear destined to fall.

All the bagged of the officers and knapsacks of the men, which were in the wagons, fell into the hands of the Mexi-cans, and little else besides the mail was saved. MYSTERIOUS.—Probable Murder.—Parts of the body of a man, viz : the skull and bones above the knees, were found on Shaver's Mountain, 13 miles from Beverly, Randolph county, on the 16th of August. No other parts of the body could be found; and there was no human habitation within 10 miles of where the discovery took place.— There was found with the bones a black cloth coat and black velvet vest; pantaloons and hat not found. There were no papers by which the body could be identified, nor was there any thing of value found with it. But it was supposed to be the remains of a man who left Pendleton county some time last Fall, and who was endeavoring to make his way to Lewis county, Va., where he had formerly lived, and was known to have some amount of money with him. The discovery was made by Messrs. Harper and Hawk, who were hunting cattle in the mountain and who buried the remains where the years found. For our own part we want our "Oyster Supper" after the election, and we intend to make that much, any-how, on the success of the Democratic ticket. *Baltimore Argus.* A CANDIDATE.—Gen. Taylor has been ques-tioned on all sides, and we have read his answers carefully. The Philadelphia Whigs wrote to him not to answer their letter, but the New Jorsey Whigs called out a reply to their nomination.— He told them plainly enough that he did not thank them for giving him a Whig nomination—that he would not consent to be the Whig candidate.— The Nativists mominated him, and he wrote to them, that he would not accept a party nomination, or make any party pledges. A Louisiana Demo-crat tried to extract an opinion from him, but he said he lad formed none, and should not attempt to do so, until elected President. A neutral edi-tor wrote, denouncing partles, and urging their dissolation; and the General answered that "them's his sentiments." On the strength of this, the Whigs say he is a good Whig; the Nativists that he is just the man they want, the neutrals that every body ought to support him, because he has no opinions; and the Democrats that they prefer principles to men and will wait until they know who will best rep-resent their principles in the canvass before they decide for whom to vote.

MONARCHY IN MEXICO-Object of Paredes' Re-turn.-We find in the Charleston Courier a trans-lation of a Havapa letter published in the La Pa-tria, which after mentioning the departure for Mexico of Paredes, accompanied by four English

Mexico of Paredes, accompanied by lour English officers, says: It has been accertained that Paredes comes with full powers to propose European intervention (An-glo Gallie, as they call it.) and to terminate at once the difficulties between Mexico and the Uni-ted States. It is also stated that afterwards Santa Aams will be banished, showing to the Mexican people that the "benefactor of his country." (bene-merite de la patria), as they call him, has done nothing else bat cheat them, and that his inten-tion has always been to sacrifice his country to his private interests. Santa Amas once banished, Paredes will assume the power, and assisted by his numerous and influential partizans, ho will establish a monarchy in Mexico, and Paredes will armies.

be nominated Generallissimo of the Mexican armies. Opinions are divided concerning the origin of this monarchy. It appears almost impossible that there should be a coalition between France and England, to place on the throne Donna Maria Christina, and the Duke of Montmorot, (Rjan-zares.) This appears ridiculous, but there are many who believe it. Others are of opinion that the plan is solely French, with the scquiescence and aid of England, which offers her assistance in order to prevent the farther, extension of ferritory by the United States, and to prevent all objections by France, when Great Britain presents herself (very soon, it is sold.) in the arena to take pos-session of the Isle of Cuba, in payment of the Span-sh debt, and with the intention that the mongrel monarchy of Mexico may lend its assistance to Great Britain, in case the United States design to reait, or oppose her possession of the Queen of Indias, (Cuba.) Gen. Paredes avoided all com-munication with any one during his short stay here.

A BRIGHT STREAK IN THE NORTH.—The Washington correspondent of the Mostgomery (Ala.) Flag communicates the following cheering information. It is one smoog the many indica-tions that the "vexed question" will be settled on fair and satisfactory terms, and that the union and the bonor and interests of the nation will ride safe-ty through the storm :—*Enq.* — T presume that you are sware that a consid-orable majority of the Democrate elected to the next Congress, from non-slaveholding States, are against the Wilmot Provise. Even a majority of the Democrate in the new delegation from New York go for the Missouri Compromise."

ARREST OF AVERET.....We learn that William B. Averett, late teller of the Virginia Bank at Lynchburg, who is charged with embezzling the funds of said Bank, has been arrested in Tennes-see, near the Virginia line, and lodged in jail, to await the requisition of the civil authorities of this State. Green, who is charged with being an ac-complice, is now confined in jail at Lynchburg, awaiting his trial....Rich. Enquirer.

OFFICIAL DERIAL.—The Washington Union denies that peremptory orders have been forward-ed to Gen. Taylor, directing him to send two regi-ments from his command to Vera Cruz. If says the Union, he selects and sends on two regiments from his command to Vera Cruz, it is only in con-sequence of the discretionary orders forwarded on his own suggestion, as we have already noticed.

TT The Trustees of the Martinsburg Academy

have invited J. Worthington Smith, A. M., at pre-sent President of the Masonic College of Missou-ri, to take charge of the Martinsburg Academy.

ABRIVAL OF COL. FRENOST.—The St. Louis Reveille, of the 29th, says that Col. Fromont and lady arrived at that city on the previous evening. Twenty-three persons belonging to the corps under Col. Fremont, accompanied him. Mrs. F. met her husband at Kanaas landing above St. Louis.

POTATOE DISEASE.—This scourge is beginning to show itself in the Britisli North American pro-vinces. The St. Johns (N. B.) Courier of the 14th says :—"The potatoe disease we regret to learn, has made its appearance in this neighbor-hood, us well as in other parts of the province, and its effects already in some fields near the city, are very alarming.

ery alarming.

CHARGE TO NATCES.—The Philadelphia Bal-atin says that Robert Tyler, son of the ex-Presi-tent, is spoken of as likely to succeed Major Polk it the Court of Naples.

Singutan.—A poor lady, at New York, has dis-covered that her brother is the Lord Mayor of Dab-lin. Beeing his name stached to the relief ac-knowledgement, made to the New York author-ties, abe compared the signature with that of a pri-vate letter, she received two years ago, and found the one w fac simile of the other.

on the Shenandoah river, at the Rocks Ferry, in Jefferson county, Virginis, adjoining the land of H. L. Opie and the heirs of the late Dr. Lewis... This farm is one among the most desirable in the county or the State, on account of its improve-ments, and the great advantages of water. There is on the premises a good Dwelling House, for Kitchen, Smoke-House, an excellent Barn. In with overjet and stables below, for 10 or 12 hor-ness; also, two of the finest Springs close to the house, an excellent stone Spring-House, a large stone Still-House, where some thousands of gal-lons of whiskey has been made, and can be again if put in operation. The location of this farm is such as to render it most desirable; the public road passes by it from all parts of the country above to the river, where the road then leads to the right and left, up and down the river, to Snickers' Ferry, Kable & Johnson's Factory, and the Shan-mondale Springs, five miles to each place, and into to Charlestown, and the same to Berryville. This place would be a most excellent stand for a Store or a Lumber Yard or Distillery, as nature-seems to have destined it for some such operations; and should the river be improved (which is now in contemplation, and will no doubt be done in less than two years) it will be one of the best and most convenient points on the whole river for a Depot. The Land is of the very best quality-the most of it river boitom, and in good order, and enclosed with a good stake and cap force. The Buildings have nearly all of them been May further description is deemed unnecessary, as those wishing to purchase will of course exam-tion for themeelves. Those in want of a farm of this description, are requested to call, as the un-dersigned believes they will not go way dissatis-fed. <u>GEORGE CASTLEMAN</u>. August 27, 1847-4t.

We wonder that people will suffer a mo-ment with this distressing and excrutiating pain when they can find a certain cure in this prepara-tion. The certificates that the proprietors have, would astonish the most incredulous. Patients, who have been laid up for years, and who never expected again to be about, in health or withont crutches, have been almost miraculously raised from their bed of pain, and restored to their friends, sound in their limbs and entirely free from pain of any kind. But if the virgin hath an affection for bim, though at first running hard to try the truth of his love, she will, (without Atalanta's yolden ball to retard her speed), pretend some cusualty, and make a voluntary halt before she cume to the mark or end of the race. Thus none was compelled to marry against their own will. we compelled to marry against their own will; and this is the cause that in this country the mar-red people are richer in their own contentment tian in other lands where so many forced match-es make feigned love and real unhappiness."

A GEM. A man possesses an extremely low and grovelling mind, who rejoices at the downfall of another. A noble heart, instead of denouncing of another. A noble heart, instead of denouncing as a consumate scoundrel one who has erred, will forow around him the manile of charity and the arms of love, and labor to bring him back to duty is do to God. We are not our own keepers. Who knows when we shall so far forget ourselves as is put forth a right hand and sin ? Heaven keeps his in the narrow path. But if we should fail, where would be the end of our course, if in every ince we saw a frow, and on every brow we read the we saw a frown, and on every brow we read revenge? Deeper and deeper would we deecend in the path of infamy; when if a different course were pursued, and a different spirit were mani-tested towards us, we might have stayed our ca-tuer of sin, and died an honest and upright man. Deal gently with those who stray. Draw them back by love and persuasion. A kies is worth a thousand kicks. A kind word is more valuable to the lost than a mine of gold. FRENCH HUSBANDS WITH EXCLISIT WIVES.—It is a carlous fact, that notwithstanding the strong pre-judices which the French entertain towards Eng-judices which the French entertain towards Eng-ind and the English, the French gentlemen give a decided preference to English ladies, when they mean to marry. An Englishman visiting Paris is surprised at the number of English ladies with French husbands whom he meets with in society. If an English lady of passable appearance remains fong unmarried in Paris, the presumption is that the fault is her own. It is worthy of remark, on viso other hand, that an English gentleman, resi-dent in Paris, very rarely marries a French lady.

The EXISTENCE or A Gov.—The universe burs with Deity. All nature seems vocal to declare a use his never-ending course, proclaims the great-ness of an Invisible Being. The pile and silvery beams of the sister orb, as the scatters the gloon of night, seems to woo men to acknowledge this great truth. The countless hosts of stars, as they seem the heavens, like diamonds set in the cornel at the shrine of Divinity. The hearse voices of the angry billows, in their ceaseless rise and fail, mirmur that they evidence the fact. The bone and muscle of every beast of the field—the way-ing of the wing of every bird of the air—the beau-ring is indelibly stamped with the impress of a Deity. Balm of Columbia-For the Hair. Baim of Columbia --- For the Hair. PERSONS who have thin hair, or whose hair is falling out, have here an article that will keep it from falling out, and increase the growth of it to a remarkable degree. This preparation was discovered some 18 or 20 years ago, since which time the sale of it has been on the increase. Thousands of bottles are sold weekly in the city of New York. It will keep the hair perfectly free from dandruff, and smoot hand glossy. Its great-est virtue is in restoring the hair on the heads of those partially bald. It has been known to re-store the hair on the heads of those who have been bald for years.

Address, JACOB FUSSELI, Ja., July 16, 1847-19. No. 30 Light st., Bolt, STOVES, STOVES. WHOLESALE AND RETAIL. THE subscriber most respectfully informs the public, that he keeps constantly on hand a general assortment of **Parlor and Cook-**ing Stoves, of the most approved patterns.— He is now manufacturing and receiving a splendid chambers. He has recently obtained a Patent for a Ventilating Air-tight Stove, which keeps up a constant circulation of air in the room, and when the Stove is closed up, the ventilator is opened at the same time, and the close, oppressive air passes of through the ventilator, and the same pleasant, healthy heat is produced as from a fire-place or open Stove. He is sole agent for Pierce's Ameri-can Air-tight Cook Stove, the best offered in this market. There are five sizes, for coal or wood. House keepers and farmers should by all means examine this superior Cooking Stove. There is a great saving of fuel, and the ozen possesses an advantage over almost any other kind of Stove now in use. It is very large, and the top being fire-brick, the moisture is absorbed during baking, and combines the advantages both of a Brick oven and a Cook Store. He keeps, also, Air-tight Cooking Rangers, and a superior assortment of Gretes for fire-places. Also puts up Furnaces for heating dwellings, banks, churches, stores, &c. S. B.
