#### Dr. Johnston,

Dr. Johnston, Member of the Royal College of Surgeons, London, Graduate from one of the most eminent Colleges of the United States, and the greater part of whose life has been spent in the Hospitals of London, Paris, Philadel, phis and elsewhere, has effected some of the most as-tonishing cures that were ever known. Many troubled with a ringing in the ears and head when asleep, great merrousness, being alarmed at sudden sounds, and bashfulness, with frequent blushing, attended some-times with derangement of mind, were cured immedi-times with derangement of mind.

#### Take Particular Notice.

Dr. J. addresses all those who have injured themselves by private and improper indulgences, that secret and solitary habit, which ruin both body and mind, unfiting them for either business or society. These are some of the sad and melancholy effects pro-

duced by early habits of youth, viz: Weakness of the Back and limbs, Pains in the Head, Dinness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dis-pepsia, Nervous Irritability, Derangement of the Diges-tive Functions, General Debility, Symptoms of Con-

sumption, &c. MENTALLY.—The fearful effects on the mind are much to be dreaded; loss of memory, confusion of ideas, depression of spirits, evil forebodings, aversion to society, self distrust, love of solitude, timidity, &c., and some of the evils produced.

#### Nervous Debility.

Weakness of the system, nervous debility and prema-ture decay, generally arising from the destructive habit of youth, that solitary practice so fatal to the healthful exatence of man, and it is the young who are most apt to become its victims from an ignorance of the dangers to which they subject themselves. I therefore adopt this mode, so as to reach as many of my Vir-ginia friends as possible. As before stated, the horrors of this epidemic have not been exaggerated. Yet, nevertheless, some erro-neous statements of fact have been made. I have read, mitted without intending the slightest disrespect, or for a moment, questioning the sincerity of those who may be, or are engaged in this controversy-to

Be not deceived in the great decrease of mortality .--The last three days are 119, 98 and 95 deaths reported, of all diseases; and the report this morning, of yellow fever deaths, is (I understand) only 48. But, the violence of the disease is as great, and as sudden, as three weeks ago. The difference is only comparative-owing to the small number of persons subject to the epidemic. I give merely the common entiment of the well informed. Should ship-loads and steamboat loads of strangers be crowded upon us before frost, we may expect that New Orleans will experience again, in October, the scenes of July and August. Therefore, let strangers beware:

RESIGNATION.

BY H. W. LONGFELLOW

There is no flock however watched and tended.

But one dead lamb is there ; There is no fireside howso'er defended

But has one vacant chair.

The air is full of farewell, to the dyings.

Vill not be comforted.

Let us be patient: these severe afflictions Not from the ground arise, But often times celestial benedictions

Assume this dark disguise.

Amid these earthly damps, What seems to us but dim funeral tapers

This life of mortal breath

Whose portals we call Death.

She is not dead the child of our affection-

But gone unto that school

And Christ himself doth rule

In that great cloister's stillness and seclusion.

She lives whom we call dead.

Day after day, we think what she is doing

In those bright realms of air; Year after year her, tender steps pursuing,

Behold her grown more fair.

Thus do we walk in her, and keep unbroken

The bond which nature gives,

May reach her where she lives.

For when with raptures wild,

But a fair maiden in her Father's mansion,

And beautiful with all the soul's expansion

And anguish long suppressed,

We will be patient and assuage the feeling

The grief that must have way.

SING ME A SONG

BY FANNY FERN.

The swelling heart heaves, moaning like the ocean

Shall we behold her face.

That cannot be at rest-

We cannot wholly stay;

By silence sanctifying, not concealing

And though impetuous with emotion

Clothed with celestial grace,

Not as a child shall we again behold her;

In our embraces we again enfold her,

She will not be a child :

Thinking that our remembrance, though unspoken,

By guardian angels led, Safe from temptation, safe from sin's pollution,

Is but a suburb of the life elysian,

May be heaven's distant lamps.

We see but dimly through the mists and vapors,

There is no death. What seems so is transition ,

Where she no longer needs our poor protection.

And mournings for the dead ; The heart of Rachael for her children crying,

That peep in the spring when the birdies sing, And the heavens are blue as our Nelly's eyes; Or tell of the child with the angel wing, Who walks in the garden of Paradise!' sung him a song I fold him a tale. And watched by his couch till we thought he slept,

For his cheek was white as the moonbeams pale, That stealthy and bright near his pillow crept Then my words grew faint and my voice sang low And I said in my dream let the scraphs sing, But he whispered soft as I rose to go-" Oh! tell of the child of the angel wing!"

Then I sang again-but he restless grew, And tossed his young arms as he wildly spoke, And a burning red on his forehead flew, As the moon went down and the morning broke But he spoke no more of the bright spring flowers. And he thought no more of his sister's eyes ; One name alone in his feverish hours,

Was breathed in a whisper that pierced the skies My mother he said," and his eyes grew dim, For the sense with her waving lustre fled, And he never knew that she knelt by him Whose son went down at his dving bed! He has gone where the Seraph sweetly sing, His story was brief as the sunset eves-He walks with the child of the angel wing,

FEMALE PIETY. The gem of all others which encircles the cornet of a lady's character is unaffected piety. Nature may lavish much upon her person

-the enchantment of the countenance-the gracefulness of her mind, or strength of her intellect; yet her loveliness is uncrowned till piety throws around the whole the sweetness and power of her charms. She then becomes unearthly in her temper-unearthly in her desires and associations. The spell which bound her affections to things below is broken, and she mounts on the silent wings of her fancy and hope, to the habitation of God, where it will be her delight to hold communion with the

spirits that have been ransomed from the thraldom of earth, and wreathed with a garland of Her beauty may throw its almost magical

riches-the sons of science and poetry may embalm her memory in history and in song-yet piety must be written in the book of life,' so that when mountains fade away, and every memento of earthly greatness is lost in the general wreck of nature, it may remain and swell the list of the mighty throng which have been clothed with the mantle of their righteousness, and their voices attuned to the melody of

God with exceeding joy, and the crown of life which shall never fade away.

That the victim of ungoverned and lawless passion, might remain in undisturbed repose in the sepulchre into which he had been gathered. with he who in his turn became the victim of the law, and who paid the full forfeit of his life in obedience to its stern and just commands. But the hope in which we had indulged has been dissipated ; the grave has been violated, the cerements which wrapt the dead, has been rudely torn asunder, and the mouldering remains of humanity exhumed to brand the living with opprobrium; or to stigmatise a system under which a crime was perpetrated. "Who is so young as not to remember the tragic end of a successor under the self same civil system? Trace the history of all subsequent administrations under this now darling civil system, and we know the same gloomy picture, without a single ray of light to relieve even the foreground," Ah indeed, say you so my fellow citizens, without distinction of party, we ask you is this true? if so, it was indiscreet thus to draw aside the veil that obstructs from the view of the rising generation this gloomy picture. "He who conceals a proper truth is equally guilty with the propagator of an injurious falsehood." If true, was it a proper truth? or if false, is it an injurious falsehood? "Truth is stronger than fiction:" if not so, are we to believe, (because he did not mention it, or was it because it was not a "proper truth") that the historical reminisences of Longinus, did not furnish him with at least one case in military history, parale with that which he has drawn from a Civil administrative power; in which the executive of power fell

beneath the blow of an assassin? Strange indeed, that he should have as much antipathy for a "cat" as a rat has, that another cared less for "cheese" than a mouse does, and that another, with a courage not to be compared to that of the rising ge\_ neration, "ran away at the sight of apples," and that he should have forgotten to advance as an argument in favor of his Military prediliction, the innumerable victims which have fallen whilst in full possession of its more than regal power.

We do not pretend to assert that tyranny cannot exist in one form of government as well as in another, in a Civil as well as in a Military admini-

strative policy. On the contrary, we believe that it always has and that it always will exist, in some shape or other, in all or under any system of Government; and until there is a radical change in the nature and constitution of man, it cannot be other wise, and so long as we entertain, this opinion, we shall feel it our bounden duty to urge the claims and support that system which has proved itself as the best protector of the interest and welfare of mankind-that system which derives its power solely from the consent of the governed, and which may be rightfully and legitimately checked whenever it exceeds its prescribed boundaries.

We are not the advocates of disorder, lawlessnes or anarchy. We are not to be found in the ranks of those, if such there he, who would offer insult or

a factious opposition to the established laws and re als have expressed doubts in regard to the truth of gulations of a government, or an institution, whe\_ ther it be an armory or a work-shop; but whenever or wherever, we find an individual, a party or a

"COULDN'T! COS HE SUNG SO !"

Leaning idly over a fence, a few days since; ve noticed a little four-year-old " lord of the creation" amusing himself in the grass by watching the frolicsome flight of birds which were playing around him. At length a beautiful bobolink pearched himself upon a drooping. bough of an apple tree, which extended to with in a few yards of the place where the urchin set, and maintaining his position, apparently unconsious of the close proximity to one whom birds usually consider a dangerous neighbor. The boy seemed astonished at his imprudence, and after regarding him steadily for a minute or two, obeying the instinct of his baser part, he picked up a stone lying at his feet, and was preparing to throw it, steadying himself carefully for a good aim. The little arm was reached backward without alarming the bird, and Bob was within an ace of damage, when, lo ! his throat swelled, and fourth came Nature's plea: "A link-a link-a l-i-n-k, bob-o-link, bob-o-link !- a-no-weet, a-no-weet ! I know it-I know it!-a-link-a-link-a-link ! don't throw it !- throw it, throw it," etc., etc. And he didn't. Slowly the little arm subsided to its natural position, and the dispised stone dropped. The minstrel charmed the muderer !-We heard the songster through, and watched his unharmed flight, as did the boy, with a sorrow-

ful countenence. Anxious to hear an expression of the little fellow's feelings, we approached him and inquired: "Why didn't you stone him, my boy ! You might have killed him and carried him home." The poor little fellow looked up doubtingly, as though he suspected our meanng; and with an expression half shame and alf sorrow, he replied : " Couldn't ! cos he sung so !" Who will aver that music hath no charms to soothe, the savage breast? Melody awakened Humanity, and Humanity-Mercy! . The angels who sing at the Creation whispered to the child's heart. The bird was saved, God was glorified by the deed.

#### CHURCH STATISTICS.

From the returns of the census, Rev. Dr. Dunny has condensed some facts relating to the number of churches, aggregate accommodations, value of church property and average value of church property.— Methodists are the most numerous and most wealthy of all the number. The Baptists, in point of numbers are the next, and the Presbyterians next in wealth, and very near the same as the Methodists. But if all who claim to be Presbyterians, such as Orthodox Congregationalists, German Reformed, &c., be added as those have who are classed as Methodists, than the Presbyterian order will foot up second in numbers, making 3,174,111, and first in wealth, making \$27, 386,562, nearly double the amount of the Methodists, and almost one-third of the aggregate of all the de-nominations named in the catalogue. THE CONSUL TO DENMARK.

We are pained to find the following paragraph in one of our exchanges (the Petersburg Democrat) received on Saturday :--

"Mr. Bedinger, consul to Denmark, has been very 111. He will leave Paris for Copenhagen as soon as the latter city is free from the cholera."

So far as we have been able to learn, no tidings have been received from Mr. Bedinger on the part of his friends in Jefferson, since his departure from New York. He had designed, we know, taking Paris in his route, and very much fear there is some good foundation for the rumor as to his indisposition. Copenhagan, the point to which he is destined, has been most sorely afflicted with the cholera, and the deaths have frequently been from three to Sour hundred per week. If even in health, he would scarcely venture in the midst of such a plague, when the citizens of the City itself, or at least all who can, are ficeing from the wrath of the fell destroyer.

#### THE MEMORY CONCESSION:

We have received the proceedings, before the Ar. mory Board of Commissioners, now in session at Springfield, up to Monday last. The evidence on behalf of the Civil Superintendency has been completed, and the Military is now being heard in its own defence. So far, we have seen nothing to substantiate their cause, or give to the friends of the Civil System any alarm as to the developments which are being made, in the vain and fruitless effort to bol- ford an equal participation in the benefit to every inster military supremacy.

This subject as may be seen from the numerous communications in our paper of to-day, may be occupying more than a just proportion of its columns, in justice to those versons who do not feel immediately interested in the matter in controversy. Yet, as at is a question in which a great principle of Civil or Military government is involved, and affecting indirectly the whole internal regulation of our affairs, every one should feel an interest in the result, and is more or less to be effected by its decision. Give to the military arm supremacy in any government, and the history of the world demonstrates, that it will soonuisurp the powers of the civil.

A Grand Banquet was given to the Commission at Springfield, on Monday evening last, by the citizens of that city, to which we acknowledge the honor of an invitation to have been present, upon the part of its managers. The occasion was a most agreeable one, and every thing arranged in the most magnificent style, as will be seen from the description which

#### BEDUCTION OF THE TABLET.

Secretary Guthrie has issued a circular in which he says that in consequence of the accumulation of money in the treasury, the ensuing Congress will probably reduce the present tariff. He therefore asks for information of the working of the present rates of duty upon the leading branches of industry of the country, and of the effect to be expected from the proposed modification. He thinks that the reductions, if any shall be made, should be so arranged as to afterest and to every section. Articles which enterinto our manufactures and those which do not come into competition with American products are those, he says, about which there will doubtless be the least question. He also proposes to abridge the labors of

the custom-house by adding to the free list articles of general consumption and articles paying little duty 13-A young man named Benj. A. overament of France inte The act of the Gov ant the rise in BBSAD, is thus con on by the London Times: According to law in France, the

in towns is determined, every fifteen days, by the mu-nicipal authority, with reference to the average price of flour, in order that the consumer may have the full benefits of a fall in the value of the material. When the price of flour rises, the assize of bread rises of course in the same proportion. By this rule, and according to the quotations of flour on the 1st of September, the price of bread should have been fixed for the ensuing fortnight at ninety cents the

loaf of two kilogrammes, (above 4 lbs.) instead of eighty cents, which had been the rate in August.— But an infimation 'was conveyed *parorare superiour* to the syndicate of the bakers that, by the Imperial will of Louis Napoleon, eighty cents was the maxi-mum price at which bread should be sold in Paris, and that the bakers were accordingly to sell their bread at that price, even though they suffered a loss, which won'll hereafter be made good by the Treasury. We could not have imagined that at this period of time, and in such a country as Franc, any government would commit so egregions an absurdity. A mexi-mum of price was one of the follies of the convention

ofi1793, but even then it was in a measure justified 'by reference to the state of the currency, had 'degenerated into assignats. In our day, however, that the Ruler of France should addistrately order bread to be supplied to the people of Paris at a price which does not cover the cost of the article, and may soon fall far below, it is a prodigy we did not expect to witness. It is, in short, to produce a fictitions cheapness, not by augmenting the supply or diminishing the real value, but by imposing a limit on the money to be exchanged for the commodity. But if bread in Paris is to be subject to forced sales at a low rate, it

is evident that corn flour and bread will be sold wherover they fetch most, and consequentily, that this absurd decree will throw the supplies of 'Peris 'entirely on the government, instead of leaving them to the more certain resources of trade."

The French Government, it appears, have a large amount of grain in its granaries, which it increases by purchases abroad. The policy of the Government has been to protect the people by being in the market for the sale of grain at cost, whenever it is deemed necessary to open the ports for the import of grain from foreign countries. This is a human proceeding. but whether it will prove to be an effectual one remains to be seen. This procedure of the Government may, in some measure, account for the dullness of the grain market at Havre and Paris. It seems

however, that any government interference in the laws of supply and demand must signally fail. Baltimore American, September the 21st,

LAVING THE CORNER-STONE.

The imposing ceremonies of laving the corner-stone of the Methodist Episcopal Church now in course of erection in this place. were performed, pursuant to previous notice, on Wednesday last the list instant, with the usual Masonic honors. We are compelled, by want of both time and space, to give but a brief description of the interesting pro-

ceedings on the vecasion. At about 11 o'clock, A. M., Good Samaritan and Bethesda Divisions, S. of T.; Shawnee Tribe, I. O. R. M; Madison and Winchester Ludges, I. O. O. F .; and Hiram Lodge, Free and Accepted Masons, of Winchester, with the visiting brothren of the several Orders, were formed into procession according to seniority. the younger taking the front, on the East side of Market street, in the centre of

town, by their respective Marshals, the whole unler the direction of Maj. L. T. MOORE, the Chief Marshal, whence, preceded by the Harpers-Ferry Band, the line moved up Market to Piccadilly,

across Piccadilly to Loudoun, down Loudoun to Cork, and across Cork to Market again. Arriving at the site of the Church, the processio

was halted and placed in open order, when the R. W. Grand Master of Virginia, EDMUND P. HUN-TER. of Martinsburg, who occupied the rear, passed

### THE FACIFIC RATLBOAD.

The Washington Borrespondent of the Enquire says he has delayed writing until he could "obecting the views of the Administration on the acific Railroad as a government undertaking," and ow he thinks he " can safely say that it has not been, t is not now, and never will be an Administration easure." Here is what the correspondent of the Enquiter says on the subject:

"That it will be constructed is not a matter of doubt; he only difficulty about it is the route. If all the lends of a road, could be united, the road would at ence be commenced, and speedily completed, even without any aid from the Göverment; but that aid will be extended by grants of land, on the alternate section principle. Thate very little doubt. By the way, barring the constitutional principle, which I do not intend to discuss, I think, as a matter of policy, and dollars and cents, the principle of granting alter nate section to railroad companies is a very goo one, and has so far worked well, for the reserve sections have been sold for more than double, and in some instances five times as much as the whole could have been sold for, besides finding ready sales for hands which have been in market for upwards of twen-ity years without finding purchasers. The country wider this system has created in more all the under this system has greatly improved-and the government instead of paying for such improvement is greatly benifited in a pecuniary point of view.— it is not then a matter of surprise, that the system should find so much favor with those who have no constitutional scruples about exercise of power-and 1 think I may as safely assume that they constitute about two thirds of each house of Congress-I therefore conclude, that that which has been done in so many cases for other roads, will not be withheld from the Pacific road—and if possible the Administreach may be willing to go that far."

#### THE GOLD MINES OF VIRGINIA.

"A writer in the New York Tribune says that of the paying gold mines in Virginia may be mentioned the Marshall mine, in Spottsylvania county, on the Rappahannock river, twelve miles from Fredericksburg. From this mine some \$300,000 have been extracted. When last visited by the writer twenty hands were employed. The yield was from \$100 to \$150 per day. The workings extend to a depth of a numerical feet. In Fluvanna county Commodore Stockton has long been working mines. The yield of gold has The workings extend to a depth of a hundred been considerable, though it is understood that large sums of money have been spent upon machinery, which was finally rejected. Very recently the mines known as the Garnett and Mosely Mines, in Buckingham county, which have passed through several hands, have finally been purchased by an English company, who are working them. This tract con-

tains 13,000 acres, upon which are several veins.— The main vein, at a depth of 110 feet is 15 feet, wide, and yields about \$20 to the ton. Besting a self of engineers they employ 70 negroes. The daily yield. we have not learned. The London and Virginia Gold and Copper Mining Company have purchased a property, adjoining the above and known as the Eldridge Mine, for \$150,000.

#### SENTENCED FOR BIGAMY-ICNORANCE OF THE LAW.

Alanson Green plead guilty in New London last week, to the charge of having two wives living, and was sentenced to ten years' imprisonment in the States' prison. Before the sentence was pronotneed, he made a speech to the Court, of which the following, says the New London Chronicle, is the substance -

May it please your honor, as I have no counsel I wish to say a few words relative to this case. My first wife was a very bad woman and I found that there was no living with her, and we separated, and we continued to live separate, and it is more than got, they had sent her Jack Hale. together, and I supn years since we ha posed that after seven years I could marry againwas so informed : but it seems those who informed me were ignorant of the law, and that I have been guilty of a crime in marrying this woman. I am sorry for it. In equity I have committed no crin.e; but in law it seems I have, and I ask your honor to deal mercifully with me. I am an old man; I am very feeble and infirm. I have had a great many troubles. I am almost blind. I married this woman and I am very sorry for it. I hope your honor will consider my case favorably. PAY THE MECHANIC. The rich man who employs a mechanic does not always know how mitch inconvenience, loss of time and expense he exposes him to, by neglecting to pay undisputed bills, on presentation. Without going too deep into the subject : let us propose a very simple example, of constant occurrence. A mechanic undertakes a job for which his honest charge is fifty dollars. It is done to the satisfaction of his employ er. He expects his pay on the presentation of his bill. Why should he not receive it? He has no bank credit; he pays cash for his stock, and he pays cash for his labor. He has been employed for a week on that job, with two or three journeymen, besides furnishing the raw materials, paving shop rent, and other expensive contingencies. Why should he be asked to wait six months or a year for his money ?-He must pay his hands on Saturday, provide for his family during the week, pay for his stock, and lay up. something against rent day. Is it reasonable-is just, that his ready employer should ask him to wait for pay until his convenient time, when cash is not scarce, when three per cent a month is not to be had on the loan of money that belongs to others, or which ought to be appropriated to the payment of honest debts, instead of sleeping and fattening at interest on post notes-or contributing to the artificial wants of his family-or gratifying a reckless spirit of specula-tion in visionary stocks? Is it righteous, is it just, that a man of supposed wealth should do this, and leave the honest, hard working mechanic to the mercies of small creditors, the importunities of journeymen, and the rapacity of usurious "extortioners?-

Citizen's Leves in Hampden Hall in honor of the Armory Com

en Hall was crowded on Mo at an early hour, on the occasion of the levee given in honor of the Armery Commission now in sesin nonor of the Armory Commission now in ses-sion in this city, and but for the fresh air of the evening, the crowd would have been suffocating. The citizens of Springfield were there of all classes, ages and conditions. The ladies were everywhere, giving life and beauty to the scene. The tables, ex-tending all round the scene badt had be been de tending all round the room, were laden by the hands of the fair ladies of Springfield with all the boun-ties and fruits of the season, and presented a very beautiful appearance. They were relived of their

urdens by the vigorous appetites of the host, "and then came the speeches. Charles Stearns presided and G. W. Harrison officiated as toast master. Governor Steele re-sponded to a sentiment in honor of the President of United States. He spoke in high terms of eulogy of President Pierce, saying, that of all the public men he had ever known, he deserved confidence more than any other, and that if there was guilt in his heart, he had never seen it. He spoke of his long acquaintance with him, and urged all to treat him and his administration with fairness and

Col. Stevenson, the President of the Com then responded to a sentiment in honor of Virginia, and spoke very eloquently of the old Dominion. He spoke with strong affection for his native State, with pride in all that Virginia had done, and in the great

pride in an that virginia ind done, and in the great men she had given to the pation. He was followed by Judge Morris of Springfield, who, in a few brief and appropriate femarks re-ferred to the early history of Massachusetts, and the days when Massachusetts and Virginia stood shoulder to shoulder in the struggles of the Revolution.

Gov. Wright of Indiana was next introduced. His speech was received with great applanse, and con-tained some very happy hits. He is rather an effec-tive stump speaker, with a good appreciation of humour. He commenced by disclaining any right to speak for the West, and claimed to come from the very centre of this great nation. He said he had been spending ten days in New England, that he came to see what had made New England, that he was. He had been struck everywhere in New En-gland with the order and system which prevailed. Gov. Wright of Indiana was next introduced. Hfs ! Every man thought, and was not a mere machine. He ascribed this in part to the lessons learned in town meetings, where every man talks about roads and bridges and measures. He traces this farther, to the schools in which all are taught the duties they owe to their country and to their God. He had been gratified in visiting the factories and worksho New England, and closed with urging the mechanics to go out to the center of the country, where he pro-mised to show them the richest soil, the noblest

rivers, the most beautiful women and the best looking Governor in the world. Chancellor Walworth responded to a sentiment in honor of the Empire State, and spoke briefly of the part acted by New York in the Revolution, and her position and influence at present.

Col. Smith spoke briefly for Connecticut and Col. Steptoe for the Army.

Capt Maynadier made a very heat little speech in behalf of the Ordnance Department. He said that one of their best establishments was in Springfield, and that they were proud of the intelligent artisans and mechanics connected here with the Department. The name of Springfield has been carried on their arms to all parts of the country, and in glory over foreign soil, and it rarely happened that a Spring-field musket got into the hands of the chemy. Govenor Steele was called upon to speak for Ner Hampshire, and said that New Hampshire could not boast like other States in her soil, or in much of anvthing but her men. He spoke of the great men who had gone from his State, and said, that though he did not wish New York any more trouble than she has

#### THE NATIONAL ARMORY. FOR THE SPIRIT OF JEFFERSON.

Having woticed the rejoinder of "Veritas," the Mili ry Missionary, (to the article that I submitted to e consideration of the public) in the Free Press of The consideration of the public) in the Free Frees of this week. I have only to say, that if his object is to bendy withcisms and anecdotes, I cannot thus con-same the time. The proposition has been advanced on or part, that the Military System over the Ar-monics is irrepublican, and the practical operations of the system tyrannical, nnecohomical and unjust.— The facts having been adduced to sustain said post eratively becomes the province of "Veri to fefute the evidence in the case at issue. As far as my observation has extended, n. marshalling of argu-iments or array of facts by the writers on behalf of the military, have been presented to the reader by way of refutation to the objections urged against said system in the various communications of the cor dents of the "Spirit of Jefferson." That a malistration of power has been frequently exercised h the milifary Commandants at this place, no advoca of the military commandants at this place, no advocate of the military system yet has dared to deny. If they can adduce the facts, why not demonstrate the error? MR. It is not often I give advice; but I would advise the friends of the Military system, if they have pitted this Longian "as a correspondent to defend their cause, to take of his gaffs and drive him from the cockpit, for his article. Ofter those which have preceded it in the his gails and drive him from the cockpit, for his article (like those which have preceded it in, the 'same paper) have diametrically an opposite effect, viz: of diverting the attention of the public from the merits of the Military system, if it ever possessed any other than that which is known to the Ordi-'hance Department.

Longinus again says, "It is not enough for me to know, that many a Simon-pure democrat hot only headed the petition referred to, but moved Hearen and earth &c. to effect a chalpe from the civil to the present system." Why was it that "many a demo-crat's name headed the petition?" and why did hey try, to move "Heaven and earth?" It was because in '1840, party-politics ran high, thd the whig party at this place being sufe of success, spotted as they (the whig party denominated it every democrat engaged in the Arthory, and threateffed them with a discharge as soon is they sitched in getting to whig for civil superintendant, notwithstanding Col. FOR THE SPIRIT OF JEFFERSON

Mr. Beller-In glancing our eyes over the Free Press, the other day, we saw an article purporting to be an answer to a former communication which made its appearance in the columns of the Spirit of Jefferson. #### SHANNONDALE SPRINGS.

The beauties of this romantic watering place are now more lovely than ever, and never ceases to produce new and sublime novelties to those who feel disposed to indulge in admiration of natures' loveliness.

Its verdant lawn, its healing waters-the majestic forest trees standing thickly studded along the rustic banks of the bold Shenandoah River-the cooling shades-the limpid stream-the constant murmur of the Falls at the feet of the beholder-the magnificent mountain scenery, all tend to remind us of the happiness enjoyed at this rural and fashionable retreat during the spring season which is about to close.

In the spring season our Town was daily enlivened by the arrival of stages filled with visiters to and from the springs, and on Sabbath days the churches of Charlestown were usually crowded with the sprightly, the gay, the pious and devout visiters therefrom.

- At Charlestown and Kabletown visitors supplied all their mercantile wants. Our merchants will therefore regret the closing of Shannondale, as much profit was derived from the shopping which was necessar rily done with the merchants of those villages. Onr Hotels, of which it is our pleasure to boast, were liberally patronized; and the liberality of the proprietor of Shannondale Springs will long be remembered by those who purchased its marketing, and always found ready sale, at reasonable prices, for all the produce furnished at the Springs.

We made many warm friends and we sincerely hope that the strong attachment formed by us for others, was mutually reciprocated by those in whom we become so deeply interested.

#### LOUDOUN AGRICULTURAL SOCIETY.

The second Annual Exhibition of the Loudout Agricultural Society will be held in the grove on the land of Mr. Joseph Mead, on Monday and Tuesday, the 24th and 25th of October next. They offer a large list of premiums, and there is no doubt every effort will be made by the enterprising and spirited farmers of the county to compete manfully for the prizes.

#### FIRE IN RICHMOND

We learn from the Richmond Enquirer, that the dwelling of Hon. JOHN Y. MASON of that City, was nearly destroyed by fire on Monday last. The fire originated in the garret, and is supposed to be due to spontaneous combustion, as the door to the room was kept locked and wasfound so after the alarm was given. A great quantity of goods of various kinds was stored in the garret, some of which was wrapped up in cloths that had been oiled for the purposes of preservation. Judge Mason's loss of furniture, goods, &c., on which there was no insurance, was about \$5000. The house was insured at \$5000, which will

cover the damage.

He met successfully, we think, the various objections heretofore urged by some in this community. against the Order, and imparted much information to his hearers, as to its origin and design, that, doubtless, will do much to correct public sentiment in relation to this ancient fraternity. SEDUCTION AND ATTEMPTED MURDEE.

Certaibly not.

A daughter of a widow lady in philadelphia, hav ing been seduced by a young man in that city, the brother of the girl, on Sunday sent for him, and appealed to him to contribute to the support of the ruined sister and her offspring, avowing his own inapility to bear the burthen imposed on him, in conseuence of long-continued ill-health. The author of the girl's ruin finally declared his willingness to mar-

ry the sister, and Sunday night, at 7 o'clock was fixed for the wedding; everything was in readinces, but the groom did hot make his appearance. The brother is said to be an extremely delicate

man, but, rendered desperate by the conduct of the seducer, on Monday morning he went to the boarding house of the latter, at the corner of Callowhill and Nixon streets, and had an interview with him. some words passed between them, and the brother drew a pistol form his pocket, for the purpose, as he declared, of shooting the destroyer of his sister. The weapon was cocked, and exploded prematurely, the entire load passed through his own right hand and wounding his leg. The sufferer was conveyed home in a high state of excitement. A warrant for the arrest of the seducer was issued and placed in the hands of a police officer.

#### WONDERFUL PARTUSITION

The Mississippi Times, (Holly Springs,) of the 1st September, comes to us with the following announcement:

Seven Children at one Birth !- Mississippi against the World !- The most astonishing parturition recorded in the annals of the human race, we are informed, occured last week in the vicinity of Salem, Tippah county, in this State. Our information i from a gentleman of veracity, who states that a lady of that neighborhood has just become the mother seven children at one birth !

Was there ever a woman in the world that beat this? Is there a woman living who can beat it?

#### AN IMPORTANT DECISION.

The Secretary of the Interior has approved a very recent decision of the Commissioner of the General Land Office under which the latter refused to sahe tion an administrator's sale of a military land warrant. The Commissioner rules that the 4th section of the act of 28th September, 1850; (under which the said land warrant was issued) exempted it from the debts of the person to whom it was issued, and made We have repetedly expressed a depts of the person to whom it was issued, and made it, until the patent shall have issued the property of the heirs of the deceased soldier, not to be aliened by pect so calamitous results from any single act is the

Mr. Trench spoke for the Press, Col Stephenson for the ladies. Mr. Kavanaugh of Holvoke for the adopted citizens, and when we left at a late hour the work of speech making was going bravely on. A great many patriotic sentiments were uttered, many grace-I compliments were bestowed, and all seemed to enjoy the occasion, even while jammed and squeezed into the smallest possible limits. Letters were read from Gov. Clifford and Senator Everett, with their thanks for the invitation to be present, and express-

ing their regret that they were unable to accept. The evening passed off pleasantly, the distinguished members of the Commission seemed gratified at meeting our citizens under such pleasant circumstances, the men were probably brave, and the women were certainly fair, and the whole, affair must have been extremely gratifying to those of our citizens who got it up, and those ladies whose liberal hands oaded the tables, and whose presence graced the hall.

#### A SICK WHIG.

John Brownies, who is & candidate for circuit judge in the eleventh judicial circuit, Indiana, publishes a circular to the voters of that circuit. In that address he thus defines his politics:

As to my politics, I have voted for whigs, democrats and free-soilers. I have never made politics any part of my business. At the last Presidential election I voted for General Scott. He was defeated. I then was, and am still, of the opinion that that defeat, with the loss of Clay and Webster, was the end of Whiggery; that any attempt to re-organize would be useless ; that the measures for which they contended were absolete and out of question. And is it not true? They contended for the United States Bank. No man is so foolish as to advocate that pol-icy at this time. They contended for a high protective tariff. That policy has been found wrong, and and now has but few advocates, and those few are those who desire to enrich themselves by the policy. They opposed the anexation of Texas. It was annexed. We now look back, and are astonished that there ever was opposition to the measure. They were opposed to the Mexican war. We had the war,

and no one contends that it was not necessary and proper. "There is nothing left upon which they can rally except it is that narrow anti-republican policy that opposes the doctrin of progress contended for by the democratic barty-that policy which has made us all what we are, and to which we look for much in future."

SLAVE RIGT IN ALLEGRENY CITY, PA-Solle time ago we noticed that a slave-mother and her four children had been rescued at Allegheny city, Pa., from the charge of a man named Stevenson, on his way from Mississippi to Baltimore. Since then one of the children has died. The rest, with the mother, continued there until Tiresday last, when Mr. Stevenson returned to claim them. The mother expressed herself as anxious to accompany him to the ity, and with Mr. S. went in search of her children, which had been secreted by the black population of that city. As soon as the arrival of Mr. S. became known, a mob of blacks assembled and made a desperate attack upon him with stones, clubs, &c., by which he received several wounds. He drew a pis-tol to defend himself, but it missed fire. The police in the mean time arrived on the spot, and restored quiet by arresting six of the rioters, who were fined by the Mayor for disorderly conduct. Legal proceedings, it is said, will be instituted to recover possession of the slaves.

### THE MISSION TO FRANCE.

In regard to this Mission which has elicited so nuch of newspaper speculation, and such hesitancy on the part of the Administration, the Richmond Examiner of Saturday, says :

It is doubtless a fixed fact that the Cabinet a Washington have determined to offer the mission to France to Mr. Jour Y. MASON, of this city. Our owii reflections, not prompted or assisted from any source whatever, lead us to believe that Judge MAson will accept the tender.

#### THE SCHISMS IN NEW YORK.

The Democratic party of New York signally failed last week at Sayracuse to harmonize upon a common basis of organization. The Sorrs greatly Galnumbered the HARDS in the delegations, and are beyond doubt far the strongest party of all others in the State. The Hards seceded from the regular convention, and passed resolutions and nominated candidates of their own for the approaching State election. The Softs of course did the same ; and the result of their respective labors may be seen in abother column,

where the several sets of resolutions and of candidates are given. For a long time we used to make painful endeavors to obtain a clear and accurate conception of New York politics, but are now further off than ever from the object of the research. Volumes have been written in explination of the subject, and very able partizan reports been promulgated, offensive and defensive, explanatory, narrative and controversial, criminating and recriminating. But the whole system of torch-lights and pyrotechnics only serve to render the darkness visible, to make confusion worse confounded.

We see nothing in the strife of the Hanbs and Sorr but a scuffle for the spoils of office. Their platformf and resolutions are the same. Their profession o attachment to national principles, and of faith in Democratic tenants, are identical. They differ only about men, and we see no ground of solicitude for the South in the success or failure of either of the tickets now brought out. We see only an example for the South to avoid. May she never, never prostitute herself, to the depths of infamy that have been reached by New York politicians for Federal office. The Whigs of New York State are soon to have their convention also. They likewise are divided into two antagonitstic segments. The Silver Grays and Woolly-heads-FILLMORE Whigs and abolitonists -are soon to make an experiment of amalgamation. The country will be duly advertised of their success. We drop the topic, not merely for the want of further remarks for the sake of inviting the views of persons more competent and more cognizant of the subject than ourselves, and with no design of saying all that is 10 be said on the topic.—*Richmond Examiner*. THE DEATH OF MAJOR ARNOLD-DESPERATE

Fight with Indians-The Mesilla Difficulty, &c. New ORLEAES, September 22.

The Picayune has later advices from Texas. The amor of Major Arnold, of the U. S. Dragoons, having been killed, is confirmed. He was shot in a duel by he army surgeon at Fort Graham:

The American Consul at El Paso is of opinion that Gen. Garland will meet with no resistance if he attacks the people of Mesilla Valley. More Mexican troops are daily arriving on the Rio Grande. The American troops in Texas are actively concentrating | than proven itself.

Writer, the public mind, would still remain in profound ignorance as to its object and purpose. "His notions fitted things so well,

That which was which he could not tell."

We have in a former communication, given our views in regard to the policy that functionaries should pursue, in the management of National Arthis glorious System of Rules, that is so pure and good as to gain thy affection, (always provided you are in it is sufficiently intelligible for those for whom it was intended. It will be remembered that the popular will is the basis upon which we stand, and de-sire to save gentlemen all and every trouble to dislodge us from it. We lielieve the safest depository of power is in the people, and any departure from this principle is a violation of the object, purpose and designs for which this government was created. We have never doubted the intelligence or capacity of this people for self-government, and we hold that the entire superstructure. executive, Legislative and . judiciary should be a reflex of the popular will, and those who perform the duties of each and every department are properly the servants and not the masters of the people. And now for the practical operations, its bearings and effects. Firstly then, by what process are those servants selected? viz; by presenting their respective qualifications to be acted on by the popular will and determined by an acquiescence of a majority. This is the process "known and read of all men." Secondly is the mipority satisfied ?- was Gen. Scott satisfied with his defeat ? again is the Whig party with the policy of the chief executive and the management of nation al affairs? "Is it not a notorious fact" that the whig party are never satisfied when they have not the management of the affairs of the government? and again, the same may be said of the democratic party. "This is a gloomy picture to present to the rising generation, without a single ra" of light to relieve the fore or back ground." Oh ! for some supernatural power to discern, that we may be enabled to make all contented and happy. But until such power is vouchsafed, our judgment inclines us to that form of government which carries out the will of the many in preference to the few. We have taken the trouble to present our sentiments to the public politically, and we have lived up to them consistently without a single exception to our knowledge. We opposed the Military superintendence over the Armories from the hour of its introduction to the present moment, from principal, and not from any private or personal consideration, for there is not a man in Harpers Ferry familiar with the events, who does not distinctly remember our position, and would have at any time imparted correct information had it been sought for by honest inquiries. We forhear making comments at this particular point, but will recommend a careful and prayerful examination of the ninth commandment from the supreme law given, viz :-- "Thou shalt not bear false withess against thy neighbor." We now propose to take a rapid view of the Military system at Harpers Ferry and challenge any man(in a point of veracity) to point to any period during the entire existence of it, including the sixteen or seventeen months, in vio-lation of a statue law of the land, that one third of the operatives could be found in support of it; but horrible to relate, before the influence was felt, a few misguided democrats got up a petition in favor of the system, and failing to succeed with Armorers the petition was circulated on the railroad then in preparation and the signatures of the laborers were ob-tained without any knowledge of its object or purpose, and this was the influence which controled

the whig party then in power. Subsequent to that period, and six months before Congress took action on the subject, the rules then enforced were of such character that the Armorers. "en mass" turned out and repaired to Washington for redress of grievance. Where were the advocates of the Military tem to be found in the Armory then? None but the "officials"-none but those who were influenced by the "Almighty dollars" and none but those can be found now. Take away the influence of the almighty dollar, and the advocates of the system would be-like the "Frenchman's flea, when you put your finger on him he would not be This is a truism "known and read by all there!

men." From the time of the introduction of the present system the Armorers have exerted themselves to get rid of it, as the ballot-bdx will sufficiently indicate. We deem it superfluous to go into a mathematical inquiry as to the influence of the Military. Scarcely a boy can be found who has not been made con-science of that fact, at least those who are old enough to remember the events of Presidential elec-tion. We will submit this point by simply remarking that if the rules and regulations, w from the ordinance department, are like the laws of the "Medes and Persians" unalterable, it has more

#### THE PLAGUE AT NEW ORLEANS.

We publish on our first page, an interesting letter as to the plague at New Orleans, from an old and esteemed friend, who is well known and most kindly appreciated, by the citizens of our county generally. Mr. North gives a most feeling and graphic description, of many of the incidents which have followed in the wake of the pestilence, as he also corrects some of the erroneous statements which have been circulated to the disparagement of the City and the cause of humanity. He pronounces the rumor as to the burning of the corpses, entirely unfounded.

Secretary Marcy's reply to the Austrian protest is robably in such a state of forwardness as that it will go ont by the next steamer. All rumors concern-ing its character or details are premature, being based wholly on the imagination of the writers. We only know that he has made the subject one of la-borious study and cautious deliberation, and from

his well known ability as a controversial writer, we therefore expect that when it sees the light, the therefore expect that when it sees the light, though it will come up to the mark of the sound progress of the day, it will embrace nothing with which the most timid conservative of the land can reasonably find fault. He possesses that to a remarkable extent. So we have no idea that such a paper from under his hand, can fail greatly to strengthen as well as to foreshadow the general foreign policy of the new Government of the United States. Indeed, it is to be the first authoritative showing of the Administra-tion's hand upon their general internal policy.

ATTENTION, FARMERS.

ATTENTION, FARMERS. MESSRS EDITORS: I beg leave to advertise through your paper, an invention of my own, for which there has been a model for some time in the Patent Office at Washington. I claim as my inven-tion a machine called a Guano Attachment, to be af-fixed to any wheat drill whatsoever. The design of this attachment is to sow a diminished quantity of Guano through the drill teeth with the seed wheat, and thus cover the Guano and Seed Wheat up togeth-er, having been long well assured that it was highly important to put a moderate quantity of guano where it would be immediately appropriated by the roots of the wheat; and that it is exceedingly injudicious to spread large quantities of a fertilizer so costly, and so volatile; over the whole surface sown in wheat. In a few days there will be in the Counties of Fauquier, Clarke, Frederick, Jefferson, &c., a number of the Drills of S. & M. Pennock, with this attachment af-fixed to them. Farmers and Mechanics who take an interest in this matter are invited to examine them. The attachment works with great regularity, ha-The attachment works with great regularity, ha-ving on a recent trial, sowed several times, without any perceptible variation, at the rate of 50 lbs guano any perceptible variation, at the rate of 30 hbs gramo to the acre, then 25 lbs., 15 lbs., 10 lbs., 41 lbs. In fact the machine will sow from 5 lbs. to 500 lbs. per acre; or the guano can be shut off altogether. Should famers who have previously purchased Drills, wish to use this attachment, I can have it affixed to any kind of Drill whatever. T. F. NELSON.

As for the extension of the Manassas Branch to that point, across the track of our road, it cannot be regarded in any other light than as a direct interference, with our chartered rights, and designed to, and originating only in a wish to injure us.

We, of course, do not blame any one for entertaining doubts in matters of this kind, but for ac ual misrepresentations, which have been freely indulged in towards our road, I might be excused for indulging in some expressions of indignation, but I forbear to do so, being content, as I know our whole Board are, to abide the results of careful and accurate surveys, from which alone the truth can be arrived at; and from the truth no good cause has anything to apprehend. The mother of the young lady, who was also the aunt of Curtis, went to the place where her daughter was sitting, and observed to Brown that she did not thank any gentleman to talk with her daughter during services, and said to Brown that he had better come into the house and set religion. At this, Brown be-came offended, and indulged in some harsh remarks against her, in the hearing of Curtis. Curtis reguired him to take the remarks back, but Brown refused to do so, and started off. Curtis drew aside with a friend, from whom, it is supposed, he berrowed a pistol, and then pursuing Brown, over-took him about one hundred yards from the meeting-house. He then struck Brown with a cow-hide. B. turned upon him. C. told him not to advance uron him, for if he did, he was a dead man. cy of the Democratic party. It willabor to inculcate this cardinal doctrine of Democratic internal policy— that this Government will best promote the freedom and prosperity of the people of the States by being less ambitious to exercise power and more anxious to preserve liberty; and by leaving to the individual States thermanagement of all their domestic concerns— while it contents itself with guarding the Confederacy from external violence, and directing the foreign pol-icy of the country to the provision of the component icy of the country to the promotion of the comm rights and honor of the States composing it. The Sentinel will advocate such a progressive foreign policy as will suit itself to the exigencies and corres-pond with the expanding interests of the country.— That policy should be energetic and decided; but should temper firmness with liberality, and make its highest ends consist with the strictest principles of

inglust ends consist with the strictist principles of justice. The real interests of the country upon each occasion demanding attention will be its guide in the course the *Sentinel* will pursue. The national policy of the world in this age is es-sentially aggressive. In the growing sense of weak-ness of some of the nations of the Old World and the ambitions restlements of others a common motion to ambitious restlessness of others, a common motive to colonial extension has developed itself. Our settled determination to repel'interference from abroad with our own domestic concerns will prompt

us to avoid it in the affairs of other countries, unless by their foreign or colonial policy our peace should be threatened, our security endangered, or our inter-ests invaded. For when the selfish interests of other nations prompt a foreign or colonial policy which in-fringes upon our rights and places in the pathway of our commerce a dangerous and unfriendly rival, such a policy must be resisted by remonstrance, and if need be by war

need be by war. Our foreign policy should indeed be defensive ; but to be properly defensive it must sometimes be apparentby aggressive. Our Administration should be vigilant, watchful, and energetic. The world is full of im-portant inovenients, commercial and political, deeply oncerning American trade and American power It is time we had an American foreign policy. We must have it. We cannot avoid it if we would. We have large interests and a greater stake in the world and its destiny than every other people. A mis-sion so full of hope, though so laden with responsi-bility, which, if properly directed, must make our Confederacy the harbinger of peace to the world as well as the penceful arbiter of its destiny. The Sentinel will, therefore, advocate a bold and earnest foreign policy, such as the condition of the country demands, but it will advocate it under the flag of the country—nowhere else. Its foreign policy must be consistent with the spotless honor and unim-peachable good faith of the country. To be respecta-ble at home and abroad, and to be great in the eyes of the world, it must ask for nothing but what is right and submit to nothing that is wrong. It must be liberal and magnanimous to the rights of others, and firm and immoveable in insisting on its own.
