CONGRESS.

MONDAY, FEB. 9.

In the Senate, after the usual morning business, Mr. Calhoun rose and said that he had seen in a newspaper published in Washington, an editorial article, which he requested the Clerk to read.

The Senate then on motion of Mr. Clayton, went into executive business, and were still sitting with closed doors at 4 o'clock.

On motion of Mr. Clayton, the House met at 11 o'clock. After the presentation of reports, receiving memorials, &c. the resolution relative to alleged frauds in the Land and Indian Agencies in the Western States, was then taken up.

The Senate was mostly engaged in private business. In the House of Representatives, the motion made by Mr. Bouldin, to reconsider the vote on the Alexandria Canal bill, coming up.

On motion of Mr. Clayton, the House met at 11 o'clock. After the presentation of reports, receiving memorials, &c. the resolution relative to alleged frauds in the Land and Indian Agencies in the Western States, was then taken up.

The House then took up the unfinished business of yesterday, being the Alexandria Canal bill. Mr. Hardin made a vigorous speech against the bill.

The House then adjourned at 4 o'clock. The House was engaged nearly all day, on the bill subscribing for stock in the Louisville Canal.

BALTIMORE, FEB. 7.

Fire.—About 12 o'clock last night, the extensive Chair-Factory of Messrs. Jacob Daley & Son, adjoining Market st. Bridge, was discovered to be on fire.

The fire commenced in the second story, and is supposed to have originated from a candle, accidentally left burning. Through the vigilance and indefatigable perseverance of our firemen, whose conduct on this occasion is deserving of all praise, the principal damage was confined to the apartment in which the fire originated, notwithstanding the combustible nature of the buildings, &c. by which it was surrounded.

What loss the Messrs. Daleys have sustained we are not able to estimate. We understand that a number of Chairs finished and unfinished, were destroyed. There is, we learn, an insurance on the property to the amount of \$5,500, in the Franklin Insurance Company of Philadelphia.

Another fire this morning about half past eleven o'clock, a fire broke out in the second story of the Athenaeum, an extensive and costly edifice on the corner of Lexington and St. Paul streets. The extreme severity of the weather, occasioned great difficulty in procuring water, and in consequence of this, and in defiance of the utmost exertions of the fire department, which was soon on the ground in great force, the flames had gained great headway, before any check could be interposed to their progress.

In the course of an hour, the flames had extended through the second and third stories of that wing of the building which fronts on Lexington street, and had already made their way to the roof. That wing of this splendid edifice completely enveloped, and as the wind carried the flames directly over the part on St. Paul's street, the destruction of the whole building, seems inevitable.

P. S.—At one o'clock P. M. the fire has been so far subdued as to leave little room to apprehend its extension to other buildings—but the splendid Athenaeum, except the bare walls is a heap of ruins!—[Patrol.

Death of William Patterson, Esq.—Died on Saturday morning last, Mr. WILLIAM PATTERSON, aged 85 years. Mr. Patterson was one of the oldest, most extensive and wealthiest merchants of this city. As a merchant and a citizen he bore an irreproachable character—and discharged the various duties incumbent on him, with punctuality, humanity and liberality. His loss will be seriously felt and long regretted in this city.—[Ball Chron.

It is said, in Washington, that in consequence of an unjust and injurious expression made use of by the President concerning Mr. Poindexter, in relation to the late attempted outrage at the Capitol, Mr. Poindexter has addressed a letter to the President.

LITTLE ROCK, (ARKS.) JAN. 9, 1835. By an officer of the Army, from Fort Gibson, we are informed that Major Armstrong had settled the preliminaries of a treaty with the Osage Indians, and that it was to have been signed on the 1st instant. The provisions of the treaty are said to be highly advantageous to the Government, and liberal to the Indians.—[Advocate.

Trenton Post Office.—Joseph Cunningham has been appointed Postmaster at Trenton, vice Jane Wilson, turned out.

This case is said to be not only a peculiar hard one, but a monstrous ungrateful one; Mrs. Wilson having been retained only just long enough to pay off, by close economy and saving, an old debt due from the late General Wilson to the Post Office Department; and as soon as that debt was discharged, she was turned out, with a large family to support, at less than one week's notice.—[Trenton Whig.

Want of Ministers.—The synod of Pittsburg, in a late report on the subject of education, says:—"It has been stated by the general agent of the Assembly's Board of Education, whose position has afforded him the means of information on this subject, that 1000 additional ministers of the Gospel are now urgently needed in the Presbyterian Church alone, to supply our vacant congregations with faithful pastors, and that 1000 more could be employed in those destitute places where no church has ever been planted, and all this exclusive of vacancies occasioned by the death of ministers from year to year."

Rail Road Accident.—A serious accident occurred on the Lexington Rail Road on the evening of the 24th inst. by the upsetting of two cars filled with passengers. It is said, Mr. L. Lockheart and A. Buckner were killed, Mr. Green mortally wounded—Mr. Leonard Taylor had his foot so mashed that amputation was deemed necessary. The foot of Wm. A. Coker, Esq. Sheriff of this county, was also seriously injured. Eight other persons were injured in a less degree, principally citizens of Lexington. We have not been able to learn the particulars, or the precise cause of the accident.—[Louisville Adc.

FOR SALE, 3 HOUSES AND LOTS.

THE one situated in Charlottesville, on the Main Street, considered the most pleasant situation in said town. It has two large rooms below and six above, including two well furnished parlors, a dining room, a kitchen, a wash-house, a stable, and a carriage house. On the same lot adjoining is a large and comfortable house, containing two rooms; also, near by, a convenient warehouse; a good stable, situated on one corner of the lot and an alley leading from the main to the back street, also belongs to said property.

Any person desiring a pleasant and healthy residence will find the above mentioned house and lot worth purchasing. The other, now in the occupancy of Mr. Thomas Libb, is situated on Liberty street, opposite one of the best views of water in town. The house is two stories high, containing four rooms, two below and the same above, with stable and smoke-house belonging. The garden is one among the largest and richest lots in Charlottesville. The property will be sold immediately, and possession given to the purchaser on the 1st of February, 1835, and the other will be occupied the first day of April.

VARIETY. Forget the rest. BY EYAN WARRINGHAM. A Lady to her Husband. Forget me not, though bright eyes...

A Truth.—Mrs. Hale never penned a truer sentence than the following: "Real and pure affection is always quiet and delicate in its attentions; and no man of refinement can long love a wife whose demonstrations of attachment are obtrusive and importunate."

Tom Hood's description of winter and its attributes is as terse as it is original and felicitous: "First it blews, then it snows;—then it thaws, and then it friz!"

A young fellow once went to court a girl, and being very bashful, he waited some time, not knowing what to say, but at length broke silence by saying: "Father's cow had a calf to-day, and it was white like a sheep!"

Philosophy.—A love smitten professor in one of our Colleges, after conversing awhile with his Dulcinea on the interesting topic of matrimony, concluded at last with a declaration, and put the very emphatic question of—"Will you have me?"

"I am sorry to disappoint you," replied the lady. "And hope my refusal will give no pain; but I must answer no." "Well, well, that will do, madam," said her philosophical lover, "and now suppose we change the subject."

An old lady who was apt to be troubled in her dreams and rather superstitious withal, informed the Parson of the parish that on the night previous she dreamed she saw her grandfather who had been dead for ten years. The clergyman asked her what she had been eating. "Oh only half of a mince pie!" "Well," says he, "if you had devoured the other half you might probably have seen your grandmother!"

Baltimore House. THIS celebrated Hotel, (known as the INDIAN QUEEN,) is now opened by the undersigned. The House has been remodeled and put in elegant order; a new addition of more than forty rooms, including a superior dining room, spacious and beautiful Saloon, a Ladies' Ordinary, and splendid Drawing room attached, and several delightful Parlors, situate on and commanding a view of the most fashionable thoroughfare of the city. The House and furniture acknowledged to be superior to what it ever has been; and the Proprietor pledges himself to the public, to use his best exertions to give a corresponding improvement to all that is essential to the comfort and pleasure of those who will honor the House with their company.

JOHN W. KING. Feb. 5, 1835.—4t. JOLLY BOGGS & Co. COMMISSION MERCHANTS. Spear's Wharf, Baltimore, Md. ARE principally engaged in the sale of produce, having several fire-proof warehouses on the line of the Rail-Road, and are at all times prepared to make liberal advances on consignments.

For Rent. WE offer for rent, our spacious DWELLING HOUSE, immediately over our store. It has six separate and distinct rooms, four of them with fire places, an entry leading to it from the front street; a good kitchen and meat house are attached. The kitchen is even with the first floor, immediately in the rear of the dwelling. This establishment, we think, would make a suitable place for private entertainment,—a place much wanted, and would of necessity be much patronized. Possession can be had immediately.

IMPORTANT TO Tanners and the Public generally. BE it known, that EDWARD S. BELL, in the county of Jefferson, and State of Virginia, have invented a new and useful improvement in the art of Tanning Animal Hides and Skins into Leather; and that the following is an abridged description of the same.

But, before entering on the Process of Tanning, they would give some general explanatory views in relation to the construction and component properties of the Animal Skin. The Animal Skin is composed, in a great measure of gelatine and a certain quantity of albuminous mucus, and possesses density, elasticity, and vascularity. It is dense, because it is an insalutary union of fibres; it is elastic, because it will restore itself to its original bulk, when compressed or crumpled.

It is vascular, because its structure is filled with capillary vessels. These vessels, with their tissue, contain various foreign matters, which constitute the impurities of the skin, from entering, and hence the slow process of tanning on the old system. The objects contemplated by their improvement are— 1st. The softening dry hides and skins and freeing them from all impurities, from entering, and hence the slow process of tanning on the old system.

2d. They have discovered a process for raising or expanding hides, so as to give them weight, &c. 3d. Preserving the tan, or tannin lixivium free from all impurities or foreign matter by filtration. 4th. Causing the tannin lixivium more readily to enter the pores of hides or skins, by mechanically compressing the hides a little under the surface of ooze or out of ooze, thereby shortening the operation to 2, 4, and 6 weeks.

The principle of compression and expansion is the basis of their system; and, to effect compression, various methods may be adopted. The method which they have found most convenient and applicable is, to stretch the hides on a smooth, substantial level platform, say 10, or 18 feet long, by 6 feet wide, (or any dimensions to suit the operators' views,) is constructed, with a vat on each side connected therewith with water light, and continuing underneath the platform, and through the following: A liquor, or water, of ooze from one side to the other; and also for the purpose of placing a heater underneath to the centre of the vat; that the ooze by it may be warmed a little—to the temperature of the animal system. Rollers are constructed in a frame, which are drawn back and forth on the platform over the hides, separately or collectively, that any scum, watery, or foreign matters that may be in their pores, may be pressed out. They are then suspended in the vat, where they are suffered to expand, and imbibe the ooze. In about 24 hours after they have passed through this operation, the tan will have become incorporated with the animal fibres. They are then taken and passed through the same operation, that the exhausted liquor, or water, &c. that now only remains, may be pressed out and leave the hides free and open for the reception of a fresh charge.

The operator must know, that the ooze should be renewed a little from time to time throughout the operation, and that the hides, which will take place in the time already stated, will be ready for use, and from 4 to 8 weeks for heavy. The strength of the ooze should be regulated by the hydrometer, beginning with ooze that will mark 2 degrees, and increasing its strength gradually until it will mark 8 degrees. The foregoing is an abridged specification of their Patent.

They do confidently assert, that they have constructed a machine, with which they have made several experiments, and find them to exceed their most sanguine expectations.— They have also leather which has been tanned in 6 weeks, upper in 4 weeks, and calf skins in 2 weeks, which will compare with any that can be procured. They have been exhibited to tanners and shoe-makers, and have been pronounced equal, if not superior, to any they ever saw.

They have no hesitation in recommending the above system to every man of science; such will at once see that it is founded on those laws of nature, that can never be supplanted. And they hope, that reason will convince the most prejudiced of the truth and simplicity of the system. The following certificates, from the most eminent tanners and shoemakers in Jefferson and Frederick Counties, Virginia: We, the subscribers, have seen and examined the leather, tanned by Edward S. Bell and Daniel Bell's new system of Mechanical Compression, and find it to be well tanned and possessing all the appearances and properties of good leather.

PATENT RIGHT SECURED. Beware of Imposition! A correct one—He was severely afflicted, and was relieved by applying Mr. Herston's Ointment. This circumstance induced many of our neighbors to apply the ointment in this disease, and proving so successful, I have endeavored to procure a patent for it, and have succeeded. JOHN COLLE. From the Hon. John Talliferro, member of Congress, dated

Washington, Jan. 23, 1835. Sir.—It has been my wish, for a considerable time, to communicate to you the good effect with which I have used the Ointment, invented by Mr. Judkins, and which I now understand is made and sold by agents appointed by yourself. I have applied this Ointment, during the last three years, to every species of tumor and wound, without failure to produce a cure in every instance. I consider it the most decided and efficient remedy in all cases of tumor, but the case to which I allude is the most singular of any that I have found no other good remedy for wounds of any description. It may be proper to add that the cure of a tumor called White Swelling, given over by the most distinguished physicians as incurable, and which the patient would, without amputation, prove fatal to the patient, was under my immediate notice effected by the use of your Ointment, and the patient is in fine health, his limb affected by the tumor being restored to a perfect state of soundness.— Also, that the leg of an aged man, which had been rendered so badly by the use of a splint, that for more than two years had been considered incurable, was effectually cured by the application of your Ointment, and the patient is now able to walk, and is in fine health, his limb being restored to a perfect state of soundness. It may be proper to add that the cure of a tumor called White Swelling, given over by the most distinguished physicians as incurable, and which the patient would, without amputation, prove fatal to the patient, was under my immediate notice effected by the use of your Ointment, and the patient is in fine health, his limb affected by the tumor being restored to a perfect state of soundness.— Also, that the leg of an aged man, which had been rendered so badly by the use of a splint, that for more than two years had been considered incurable, was effectually cured by the application of your Ointment, and the patient is now able to walk, and is in fine health, his limb being restored to a perfect state of soundness. I have applied this Ointment, during the last three years, to every species of tumor and wound, without failure to produce a cure in every instance. I consider it the most decided and efficient remedy in all cases of tumor, but the case to which I allude is the most singular of any that I have found no other good remedy for wounds of any description.
