THE RESULT IN JEFFERSON.

The Whigs have just reason to be proud of the glorious victory achieved in the late contest. No exertion was spared by our opponents to reduce the majority,-and many of them were sanguine that our majority would not exceed 50. _

In 1840, our majority was 75, and many were the confident calculations made by the Locofocos upon reducing it-but we have triumphed, and given a majority which should make every Jefferson Whig proud of himself. They have triumphantly vindicated the fair fame of the patriot Clay from the foul and infamous charges brought against him in the Locefoco circulars and bills which were put in circulation a few days before the election, for the purpose of exercising an undue influence on them.

Nothing daunted, they entered the contest with a strong purpose of doing their duty, and gallantly have they sustained themselves in the contest. They had all to contend against. Yet they have achieved a victory. , in the fight, and merit the thanks of their Whig brethren of the county generally.

OHIO GONE FOR CLAY! Ohio.

The returns from Ohio are of the most abimating character, and there is no doubt that the Buckeye State has gone for Clay by from 5 to 8,000 majority. The Vote for President in 1840 is also given for reference.

MESSUS SAME: —Guttenen —I consider it but an act of justice to jou to state the following facts in reference to the great henefit I have received, in the cure of an obstinate Cancerous Ucer on my breast. I was stended eighteen months by a regular and skilful Physician, sasisted by the dvice and course! of one of our nest able and experienced Surgeons without the least heaft whatever. All the various methods of treating saucer were resorted to: for five A Warranted Cure for RHEUMATISM we ke in succession my breast was hurned with caustic three times a day, and for six it was daily syringed with a weak solution of nutric acid, and the ringed with a weak solution of natric acid, and the evily or internal aleer was so large that it held, an office of the solution. The Doctor proped the aleer and examined the cone, and said the disease was advancing rapidly to the L. ngs, and if I did not get speedy relief by addicine or an operation, the result would be fatal. Elwas advised to have the breast laid open and the bines examined, but finding no relief from what had been done, and feeling that I was rapidly getting worse, I almost despined of recovery and considered by case nearly hopeless.

Seeing various thomonials and certificates of cure by the use of a Sarps's Sarsarantilla" in cases si-

by the use of " Sat ps's Sansapanilla" in cases similar to my owe, I concluded to try a few bottles, several of which were used, but from the long, deep several of which were used, but trop the long, deep seated character old my disease, produced an very decided change; proseduring this as the only probable cure for my rate, I persevered until the disease was entirely cured. It is now over eleven manths since the cure was completed; there is not the slightest appearance of return. I therefore pronounce myself well, and the cure entirely effected by SANDS'S SANGAY, WILLS, AS I took no other medicine of any bind degree the time. of any kind during the tink I was using it nor have I taken any since.
