BY MES. AMEIA B. WELBY. Oh, for the bright and gladsome hours, When, like a windering stream, My spirit caught from earth and sky The light of over beam; When, if into my langhing eye A tear drop chanced to start, When whished in a moment by The first spring timest. When every tone of wind and With melody was rife ; When all youth's hopes and promises, Those rainbows of my sky, D-need forth in fairy visions defore my wandering eye.

BE A CHILD AGAIN.

Tirgimia Free Urcss.

My heart is with the leaping rills, That murmue round lift hame, Where first my lips w. r. taught to speak\_ My tiny feet to roam ; The sweet songs of the happy birds, The whispering wild-voiced breeze That caught the faint breath of the rose, And waved among the trees.

How many mournful memories Steal gently through the mind, Like spirit voices borne along Upon the wandering wind ! And, as thought leads me back again, I almost seem to trace, In each sweet flower, and shrub, and tree, Some old familiar face.

'Tis thought, because I smile on all, That I am vaio and gav-That, by the world's light flattery I might be lured astray : They know not that my heart oft breather Its fragrance cut in sighs, That sad songs tremble on my lips, And tears within my eyes.

My thoughts are all as pure and sweet, As when I was a child, And all my bright imsginings Are just as free and wild : And were it not for one bright link, Within affection's claim, I'd wish to wander to that spot, And be a child again.

# RESULTS BEFORE SPECULATIONS.

The Lynchburg Virginian well observes, that the most triumphant vindication of the Tariff policy is its results. It restrains exorbitant importations of foreign goods, and consequently keeps the "balance of trade" in equipoise, and prevents the excessive drain of specie to pay our indebtedness abroad. In this way, it prevents ruinous commercial fluctuations, while it tends to keep our currency from derangement. It at the same time furnishes an extensive home market for the consumption of many agricultural products, which can find no consumers elsewhere, while it reduces the price of all the fabrics which the agricultural portions of the community have to buy, that being the inevitable tendency of competition and multiplied production. These are its fruits - and they will outweigh all the speculative opinions of mere theorists and the interested declarations of the agents and factors of foreign maufacturers, who swarm | The free trade associations and abolition societheir American rivals.

#### A NEW METHOD For Healing the Discontents.

They have a number of new plans and original modes of "harmonizing" the office-seekers and office holders who may receive their discharge. But the following little narrative is deeidedly the best, and the inventor of the plan should certainly receive a patent for "harmonizing all branches and classes of the Democracy." The story goes that Mr. Cambloss, a Locofeco Clerk with a salary of \$1400 in the General Land Office, was found to be a little too aristocratic for a democrat, he having been a manager of the Tyler Polk Bell on the 4th of March last, at \$10 a. ticket, in opposition to the Polk and Dallas Ball on the same evening, at \$5 a ticket, and so was notified that he must resign his clerkship, or submit to a dismissal. This was hard, of course, towards a true blue Locofeco ! But what was to be done? His place was wanted for, and by, another man-and so, as the story goes, the matter was compounded by allowing Mr. Cambloss to leave for New Jersey, and to receive the salary of his office for two months thereafter !

#### THE HARMONIOUS DEMOCRACY.

In order to keep our friends among the Demo eracy fully apprised of the progress of harmony and good feeling among their brethren in other States, we copy the following from a correspon dent of the Baltimore Patriot :

"The quarrel among the various factions of the "harmonious democracy" goes bravely on. In Mississippi, the Mississippian at Jackson, the Septinel at Vicksburg, and one or two other Locofoco journals fied all sorts of fault with Mr. Secretary Walker, and quarrel with the papers that defend him in withholding Thompson's commission as Senator, and connection with the Chectaw epeculations.

That there has been for some time past a secret foreign influence directed against some of the

larged, the more inferior men and low demainstitutions of the country, and particularly agogues the body will contain, as experience has gainst one of those of the South, we have always demonstrated, and we would have the Senate had cause to believe. SWARTWOUTING IN OHIO,

The Locofeco office holders in Ohio have been laving the game of "grab and hold-fast" with a vengeance. The Board of Public Works, like the one in Pennsylvaniz, has been used for the purposes of party and richly indeed have some of the party profited by their connexion with it. The Ohio State Journal furnishes a list of these eculators, and says they are facts which can be verified by an examination of the papers and records of the public offices. First in the lis comes Timothy Bates, who was appointed in the spring of 1837, and turned out by the Whigs in April, 1838, and re-appointed by a Locofoco majority in April, 1539. When Bates was :nrned out the 1st of April, 1838, he was a defaulter in the sum of seven thousand nine hundred and forty three dollars and seventy three cents ; and when he was re-appointed in April, 1839, he had not paid one cent of this sum ; and the books in the public offices showed that he was a defaulter .-When Bates left the office in April, 1842, the books show a second balance against him of \$5,-582 84 ; making in all the sum of thirteen thousand five hundred and twenty six dollars and fiftyseren cents of the people's moticy in the hands of Mr. Bates, appropriated to his own or the par-

ty's use. Leander Ransom is another member of the late Board ; the books show in his hands a very pretty sum of morey. We will not undertake to state it to a cent! but it exceeds the sum of eight thousand dollars !

MESSRS. SANDS:-Gentlemen -1 consider it but an act of justice to you to state the following facts in reference to the great benefit I have received, in the cure of an obstinate Cancerous Ulcer on my breast. I was sttended eighteen months by a regular and skilful Physician, assisted by the advice and counsel of one of our most able and experienced Surgeons without the least benefit whatever. All the various peration for several years, and at present methods of treating cancer were resorted to; for five weeks in succession my breast was burned with caustic three times a day, and for six it was daily syringed with a weak solution of nitrie acid, and the eavity or internal ulcer was so large that it held an ounce of the solution. The Doctor probed the ulcer and examined the bone, and said the disease was advancing rapidly to the Lungs, and if I did not get speedy relief by medicine or an operation, the result would be fatal. I was advised to have the breast lief from what had been done, and feeling that I was
