CHARLESTO WY: THURSDAY MORNING. Angest 12, 1847.

The People's Candidate for President, GEN. ZACHARY TAYLOR.

We think the Richmond Enquirer has lacked an exercise of the faitness which it claims for itself, in omitting to copy our article on the subject of the letter erroseously imputed by other papers, to Lieut. Washington, on the subject of Gen. Taylor's political opinions.

neither quated nor intimated, in any and vague suppositions. spe or form, that Lieut. Washington wis the author of that letter -That the incorrect inference of the Richmond Whig was not promptly corrected by us, has already been explained. It seems to us the Enquirer and its copyists, attached a very unnecessary importance to the mere question of authorship. We did not feel ourselves at liberty to give the name of any officer as the writer. But we have stated what we now repeat, that our authority was indisputable. The information was perfectly conclusive to our mind, and just as reliable as if coming from Lieut. W. or any other gentleman who had proper opportunities of knowing Gen. Taylor's sentiments. We may hereafter be allowed to give the name.

We hope, however, our Whig friends will take no further trouble to prove Gen. Taylor's Whiggery. It is enough to know that he is just as invincible in his position of candidate for the suffrages of the American people as he was at Buena Vista -- and we have no desire, by blazoning his political sentiments, to run counter to the honest prejudices of the thourands who are now rallying under his banner. We do not expect politicians by trade to fell in. But the Old Hero has no need of them. His supporters are already entitled to the appellation of Legion and no clamer of the alarmed cohorts of power can now reverse the flood tide upon which his vessel is gallantly float-

Checks to a large amount, have been forged in the names of some of our best citizens, and! the amount of defalcation has been acces tained to be much larger than was at first supposed. The transaction appears to: civil authorities by his bail securities, and is now in jail, swaiting his trial : and it will be seen by reference to our advertising columns, that the President and Directors of the Bank have offered a re-

It seems that the negotiations for peace have not been acted upon either by Congress or the commissioners said to have been appointed for the purpose.

General Scott was to take up his march for the Capital on the 15th. If this be the case he is therefore, in all probability, at present, in the Halls of the Montezumas, unless some unexpected reverse has overtaken him.

Gen. Sauts Anna it is reported has under his command an army of 22,000 men. ready to defend the Capital and eppose Gon. Scott.

It is supposed that the forces under Gen. Scott number about 15 000 treops. Santa Fe, a small village near Vera Cruz, had been entirely burned down by order of Gen. Wilson.

Gon, Pierce, who left Vera Cruz with 3,000 men, had encountered and put to toute a large body of guerrillas. The killed among the Mexicans is said to be very large, and only a few Americans killed and wounded.

Santa Anna and Canalino had quarrelled about the defence of this city. Canalizo did not want the city injured, as there was no hope of successful re-sistance. He preferred to meet our troops in the plain, and there decide the contest. Senta Anna would not agree to this, so no opposition was made.

The Picayune remarks: We have not a doubt of the perfect sincerity of the edttor of the National in his belief of this intelligence, but we are unable to arrive at the same conclusion with him. We fear the announcement is entirely premature. All the intelligence contained in the extra of the National was communiested to us on Friday evening. It did not then command out belief, and consequently was not communicated to our teaders on vesterday morning. We have been no reason to change the opinion we first formed of the news.

It is asserted by many that Fevers, and in fact, att sets or dazens; albata dinner and dessert tooks, diseases are caused by an impure state of the Blood table and tea speans, butter and fru knives; The impurities which usually pass off by the bowels brass, iron pierced, and bronze English) and and various other sutlets, being retained in the French fenders, with andirons and tonger and blood, renders it unfit for the nourishment and supshevels, in setts or pairs to match; brass andi-rons, curtain bands, chandeliers, hall and solar duces disease—and that part of the system which is weakest is most easily affected. The Bowels being the principal channel through which a great portion of the impurities of the avec-tem are discharged, it is evident that whatever actbeneficially on them must be conducive to health. -And as the Bowels are the most effectual, and in

fact, almost the only way by which a general imression can be made upon the system, it is perfectly reasonable to suppose, that nearly all diseases will be cured, or at least, much benefitted by a judicious use of purgative medicines. If a physician is called to a patient, what is the first thing done ! He prescribes a dese or two of purgative medicines; and then, after a day or two, if the patient is no better, he gives him another dose of purgative medicine, and so on; doing some other little things—but the main reliance for a cure is upon the effect pro-duced by purgative medicines. Therefore if you are sick, delay not, but take a few dozes of Dr. Gor-dons Vegetable Family Pills, and be again restored to health.
