AGRICULTURAL CHEMIST.—We learn from the Worcester Mail, that Dr. Higgins, the State Agricultural Chemist, closed his labors in that country on Monday week. The Herald says: "It has been in the county for nearly seven weeks, during which time he has been constantly engaged in analyzing many varieties of soil. His lectures have been heard with great attention by the agriculturists of this section. He operates next in Cecil county, and then in Somerset, when he will have finished his labors as far as the law now permits, which he is acting, will allow upon the Eastern Shore of the State."

DO SPECTRES APPEAR?

Misses Harrow's. Your correspondent "Irving," in his interesting communication of last week, remembers (he says) to have read of an Indian who drew the bow of a hill and raising his eyes on the muzzle of his rifle, thus, I presume, saving his comrades the squall of a storm, now although the Lecturer is a spectator in no sense of the term, he has learned enough of military maneuvers, ever to be caught by such a ruse of guile. His reason is somewhat unsatisfactory in his character, but he could never be guilty of such a blunder as to mistake an empty rifle for a loaded one, and he would not be so stupid as to believe that he could be so easily deceived by a ruse of guile. He is, however, a very good fellow, and he will, in all probability, and a few words of his speech. The Lecturer has two excellent resolutions, and every one who reads them will be glad to see them. The first is, "I will not be a party to any measure which will not be for the benefit of the people." The second is, "I will not be a party to any measure which will not be for the benefit of the people."

CLUTCHING THE SPOOLS.

The late act of the Legislature, in giving the Governor some patronage not hitherto confined to him, has sharpened the appetite of the Democrats, and local officers that ought to be secured. Upon this, the Richmond Whig remarks: "We presume there can no longer be a doubt, but that the Locofoco party, since the Federal Treasury was closed against them, purpose a general rush upon the Treasury of Virginia. The substitute is a very inadequate one, but any part in a storm, it has come to equitably, and the Whigs are entitled to live as the whole expense—and as Gen. Taylor, who is the guardian of the Federal Treasury, unfortunately for them, entertains a different notion, they hope to find a Democratic Governor holding more Democratic principles. They have seized upon all they could at once lay their hands upon, and are trusted to the Governor, in the full assurance that he will distribute it among themselves. Their game is to get as much more as they can, in the language of the Equivocal, to give as far as possible, appointments to the Governor."

CLUTCHING THE SPOOLS.

THE LOCOFOCOISM.—The Union, unintentionally no doubt, has perpetrated a truth in reference to the future action of its party. It emphatically calls upon the faithful of the "Democratic" rally to "We mean to do our duty; and, whatever the future may be, we mean to oppose the Administration and its call to the bitter end."

CLUTCHING THE SPOOLS.

There it is, unblushingly proclaimed to the world, that whatever the future of Gen. Taylor's Administration may be, the Locofoco party will oppose it. We said weeks since that the Opposition was organizing on the foundation of the combinations to oppose the Administration of Mr. Adams though it should be "as pure as the angels at the right time, and as true as the stars in heaven." This was a mistake, and we were abused of course. The progress of time brings an open avowal of this kind for a purpose. Let the people see to it, if they value correct action and good government.

CLUTCHING THE SPOOLS.

THE STAR THAT NEVER SETS.—The noble State of Vermont is still true to herself. She has just given a fresh proof of her fidelity to the Union, and to her cherished republican principles. Unseduced and unmoved by all the insinuations of the term fanaticism—religious or political—she has come out of her recent struggle with her Whig banner unshaken and triumphant. At her annual election, on Tuesday last, notwithstanding the coalition which existed there, as at the late election in Rhode Island, Whigs succeeded in electing their excellent candidate, Professor James Menahan, to Congress, to succeed Mr. Marsh in the third district of the State; and that the whole State has gone for the Whigs by large majorities.
